GAMIFIED BULIG

BUKIDNON'S UNIFIED LITERACY AND INTERVENTION GATEWAY

USER MANUAL

BULIG User Manual
Roles and Organization

How the Division, municipalities, districts, schools, teachers and pupils use the Bukidnon's Unified Literacy and Intervention Gateway: accounts, roles, dashboards, ID cards, messages and privacy.

Version 211 | November 2026 | For administrators, teachers and pupils

CONTENTS

What is in this manual

BULIG is now one system for the whole Schools Division of Bukidnon. Each person signs in once and sees only their own part of the organization.

1 The organization and the 9 roles
2 Signing in, roles and IDs
3 What each role can do
4 Division Admin

10 School Admin and Principal
11 Teacher
12 Pupil
13 Messages and privacy
14 Bug reports
15 Updating the live site
16 Questions and answers

Getting started

Division Admin

1. Upload the Division and municipality logos. 2. Check Schools waiting for a district. 3. Add the Municipal Admins and Viewers, and print their ID cards.

Municipal and District Admins

Add the people of the level below you (District Admins, then School Admins and Principals) and give each one their ID card.

School Admin

Add or check the teachers of the school, print their Teacher ID cards, and help teachers with their pupils.

Teachers and pupils

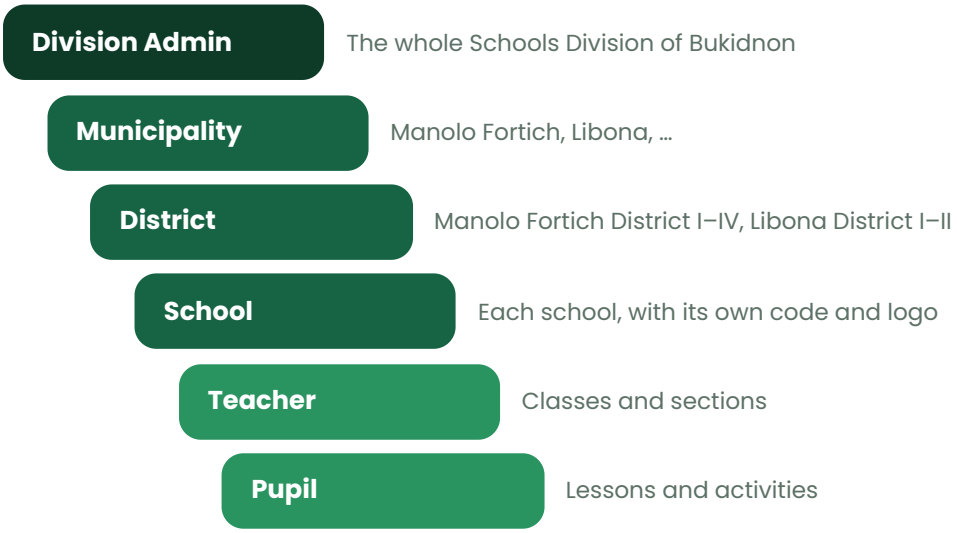

Nothing to set up. Sign in as before, or scan the QR code on the ID card or ticket.

Existing accounts are safe. No account was deleted or recreated. Every teacher and pupil keeps their ID, password, classes, progress and XP. The administrator from before the update is now the **Division Admin**.

CHAPTER 1

The organization and the 9 roles

BULIG follows the DepEd structure. Each level creates the accounts of the level right below it.

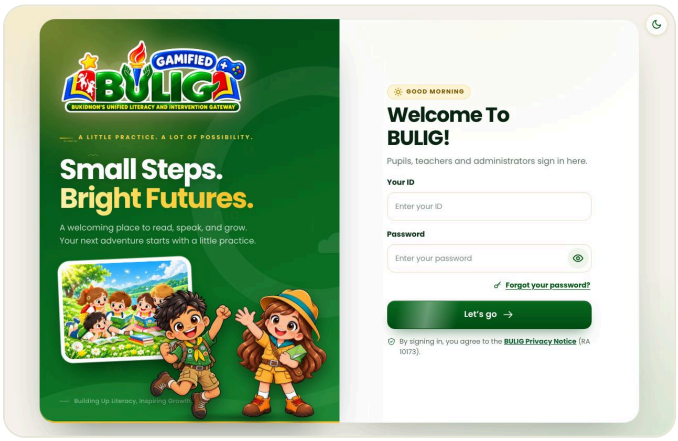

ROLE	WHAT THEY DO	CREATED BY	ID
Division Admin	Runs the whole system	(the first administrator)	DV260001
Municipal Admin	Manages one municipality: its District Admins and Supervisors	Division Admin	MA260001
Municipal Viewer	Looks at one municipality (view only)	Division Admin	MV260001
District Admin	Manages one district: its School Admins and Principals	Municipal Admin	DA260001
District Supervisor	Looks at one district (view only)	Municipal Admin	DS260001
School Admin	Runs one school: teachers, pupils, sections	District Admin	SA260001
School Principal	Looks at one school (view only)	District Admin	SP260001
Teacher	Teaches classes and checks readings	School Admin	TCEST0001
Pupil	Learns to read	Teacher or School Admin	TCES260001

One person, many roles. A teacher can also be a School Admin, with **one account and one ID**. They choose the role to use after signing in.

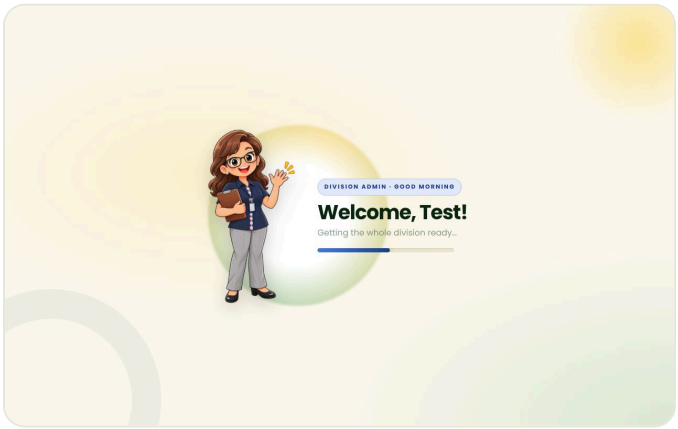

CHAPTER 2

Signing in, roles and IDs

Everyone uses the same sign-in page. BULIG knows the role from the ID.

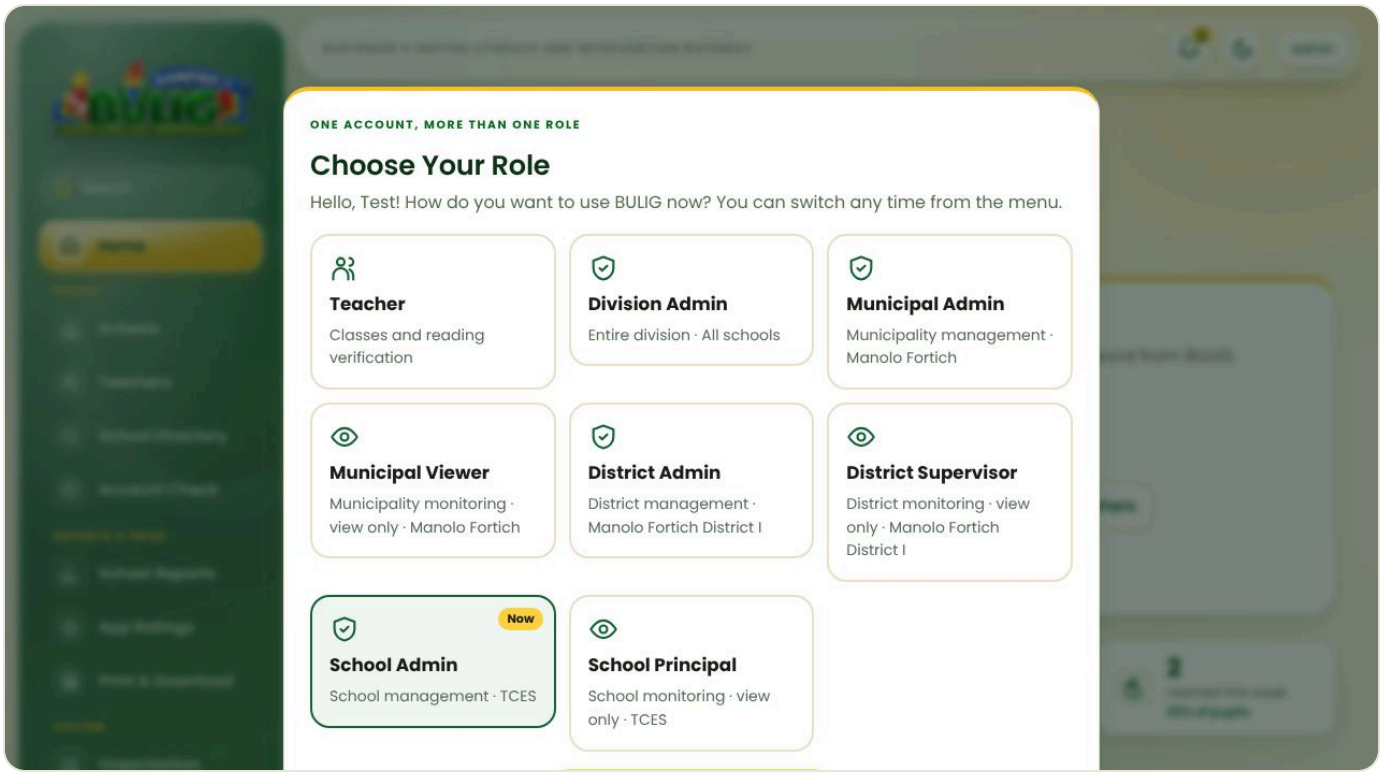

The sign-in page

The welcome screen after signing in

1. Open BULIG and type your **ID** and **password**, or simply **scan the QR code** on your ID card or ticket to sign in.
2. A welcome screen greets you with your character and your role.
3. If you have **more than one role**, the **Choose Your Role** popup appears. Pick a role, or press **Continue as …** to keep the one you used last.
4. To change role later, use **Role** at the bottom of the menu. You never need to sign out.

Choose Your Role, for a person with several roles

IDs and passwords

IDs never change

An ID stays the same for life, even when a pupil moves up a grade or the school code changes. BULIG makes every ID; nobody types one.

Forgot your password?

Ask the person who manages you: your teacher (pupils), your School Admin (teachers), or the administrator one level up. They press **New password** and give you your new ID card.

CHAPTER 3

What each role can do

The server checks every page and every button. A role that may not do something does not see it, and cannot open it with a link.

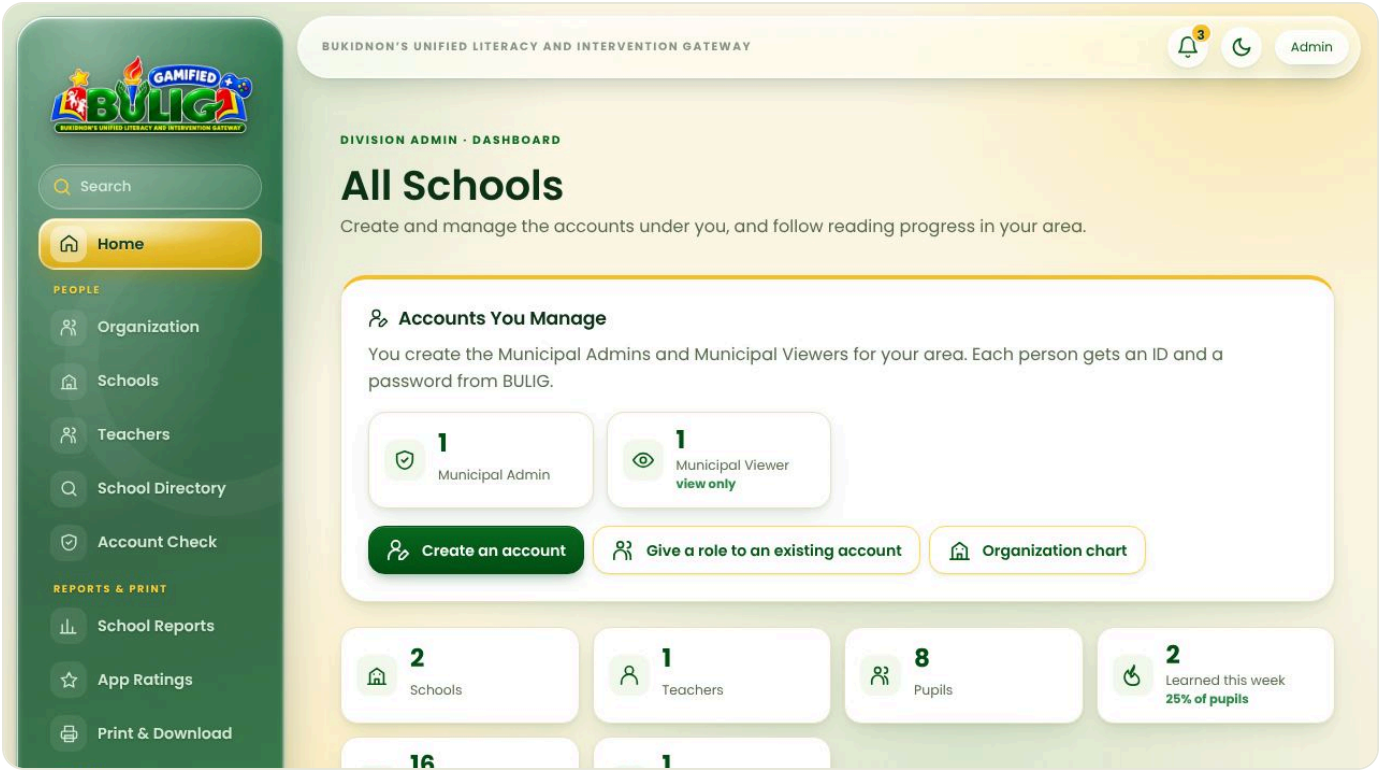

FEATURE	DIVISION	MUNI ADMIN	MUNI VIEWER	DISTRICT ADMIN	DISTRICT SUP.	SCHOOL ADMIN	PRINCIPAL	TEACHER	PUPIL
Create accounts	MA, MV	DA, DS	–	SA, SP	–	Teachers, pupils	–	Pupils	–
Organization page	✓	✓	**view**	✓	**view**	**view**	**view**	–	–
Add municipalities	✓	–	–	–	–	–	–	–	–
Add districts	✓	own	–	–	–	–	–	–	–
Add schools, set district	✓	✓	–	own	–	–	–	–	–
Teachers: add, reset, Teacher Passes	✓	–	–	–	–	✓	–	–	–
Move pupils, sections	✓	–	–	–	–	✓	–	own	–
Admin Passes (ID cards)	✓	✓	–	✓	–	–	–	–	–
Reports and progress	**view**	**view**	**view**	**view**	**view**	**view**	**view**	own class	own
Verify readings, scores	–	–	–	–	–	–	–	✓	–
Announcements	✓	–	–	–	–	own school	–	–	–
School year, schedule	✓	–	–	–	–	–	–	–	–
Bug reports, Activity log, Cleanup	✓	–	–	–	–	–	–	–	–
Messages	✓	✓	✓	✓	✓	✓	✓	✓	✓
Read teacher–pupil chats	–	–	–	–	–	–	–	own	own

✓ = can do · view = can look but not change · – = no access. **View-only roles** (Municipal Viewer, District Supervisor, School Principal) see a **View only** badge. Nobody above the teacher can change a pupil's scores or a teacher's reading checks.

CHAPTER 4

Division Admin

The Division Admin sees the whole Division, creates the Municipal Admins and Viewers, and looks after the system.

The Division Admin dashboard

Accounts you manage

How many Municipal Admins and Viewers you made, with **Create an account** and **Give a role to an existing account**.

Your area at a glance

Schools, teachers, pupils, who learned this week, lessons finished and readings waiting, then pupils by level and every school compared.

System pages

Bug reports, Activity log, Data cleanup, backups, School year and Schedule are for the Division Admin only.

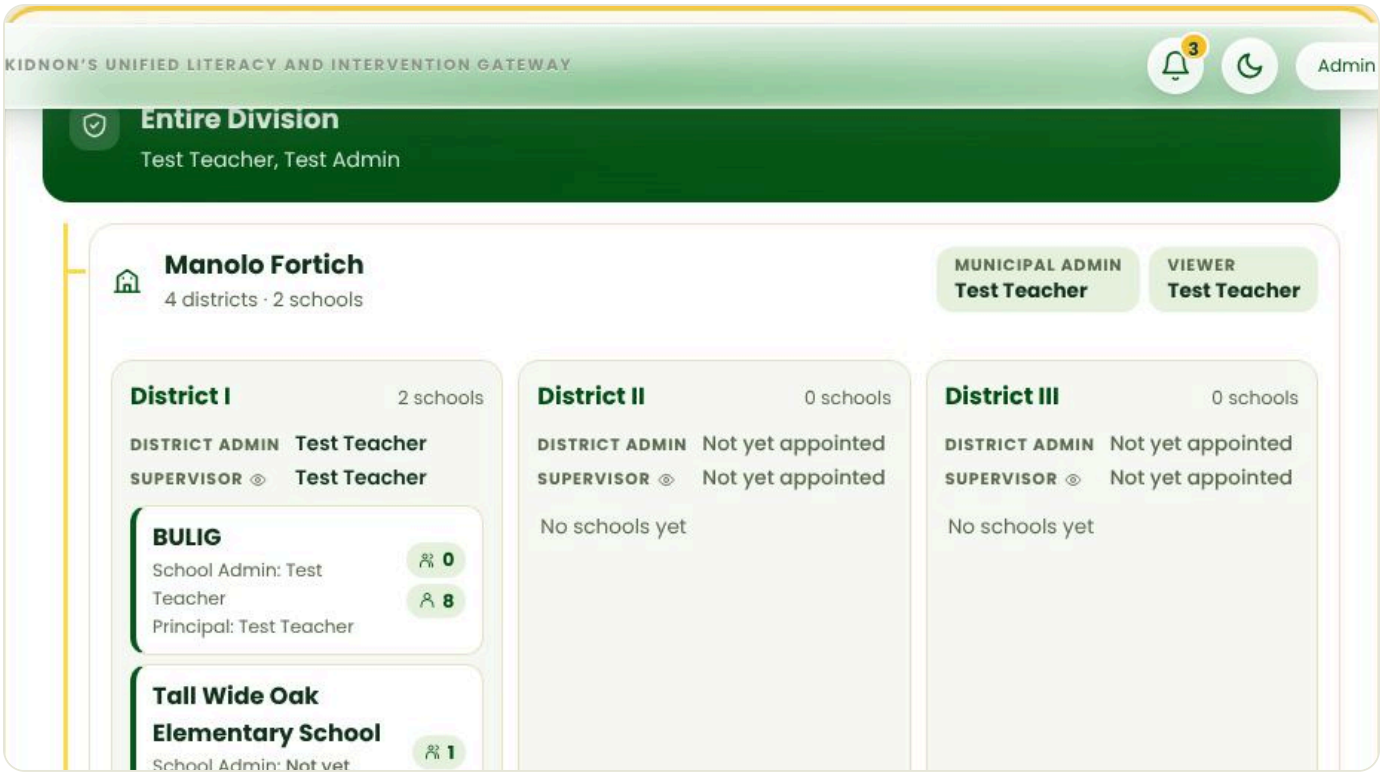

Logos

Settings › School info: the Division logo. It prints on every ID card and report card.

CHAPTER 5

The Organization page

PEOPLE › Organization. The whole organization as a tree: the Division, each municipality, its districts and their schools, with who manages each one.

The organization tree

What you can do here

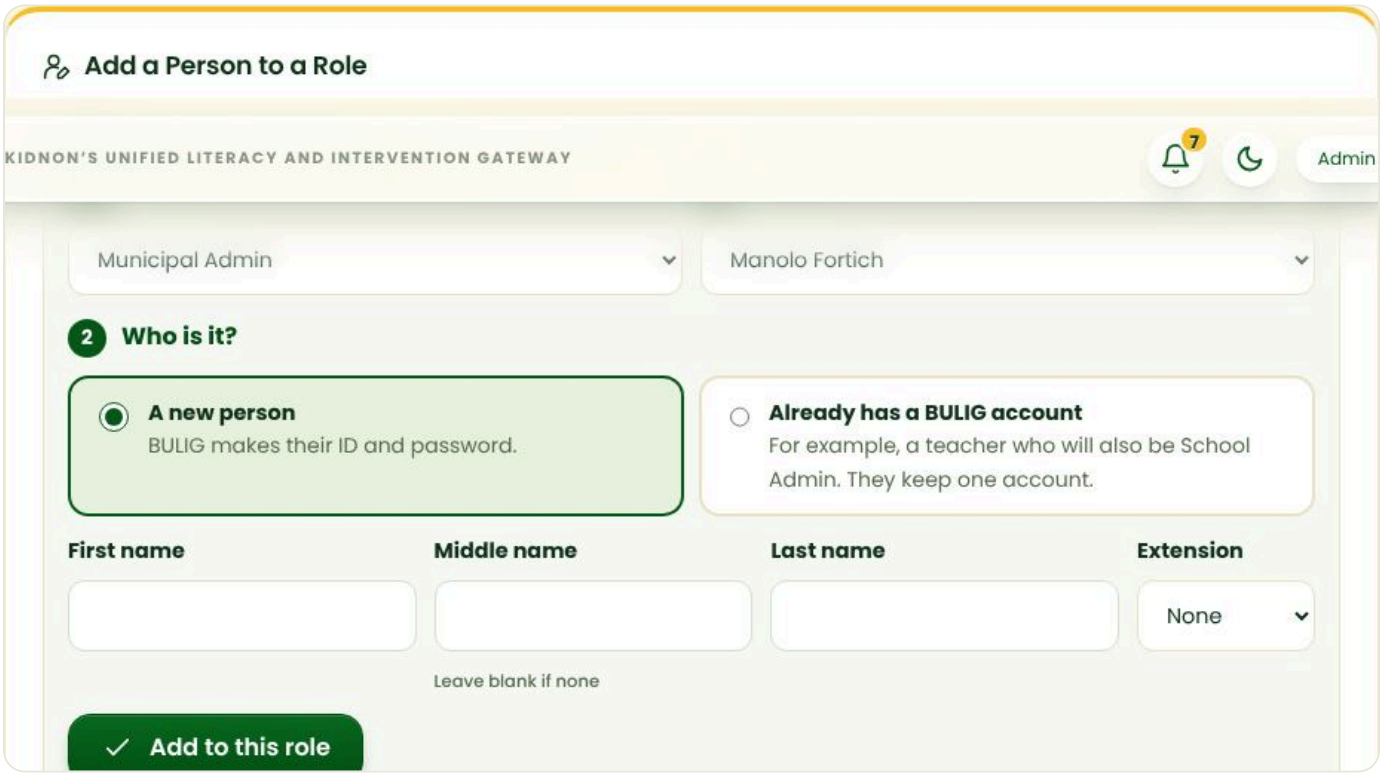

1. **Add a municipality** (Division Admin): type its name and how many districts it has.
2. **Add a district** (Division Admin or that town's Municipal Admin): the dashed box in each municipality.
3. **Upload the municipality logo**: under each municipality. It prints on the ID cards of everyone in that town.
4. **Schools waiting for a district**: choose each school's district. BULIG links a school by itself only when its typed district names exactly one district; it never guesses.

Each school shows its School Admin, its Principal, and how many teachers and pupils it has. Tap a school to open its page.

CHAPTER 6

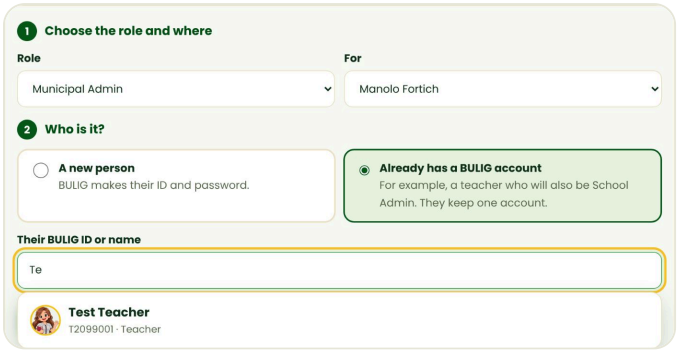

Adding a person to a role

One form does it all: Organization › **Add a person to a role**.

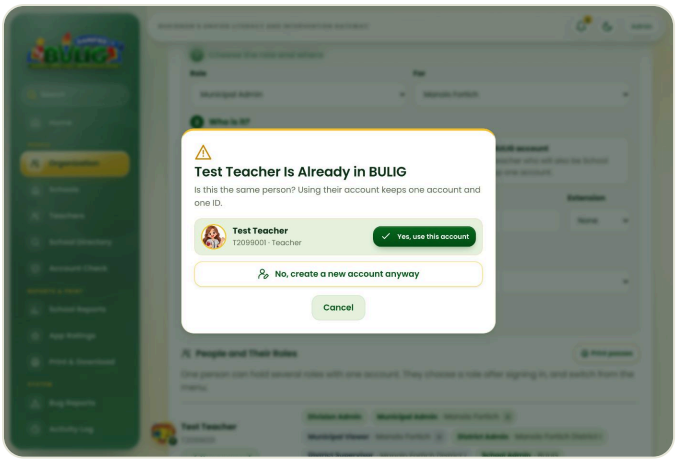

Add a person to a role

1. **Choose the role and where.** The “For” list shows only places that fit the role.
2. **Who is it?** Choose **A new person** and type the first, middle and last name, the extension and Male or Female (for the ID picture), or choose **Already has a BULIG account**.
3. For an existing account, type an **ID or a name**: a list shows matching people with their picture, name and ID. Pick one.
4. Press **Add to this role**.

Find an existing account by ID or name

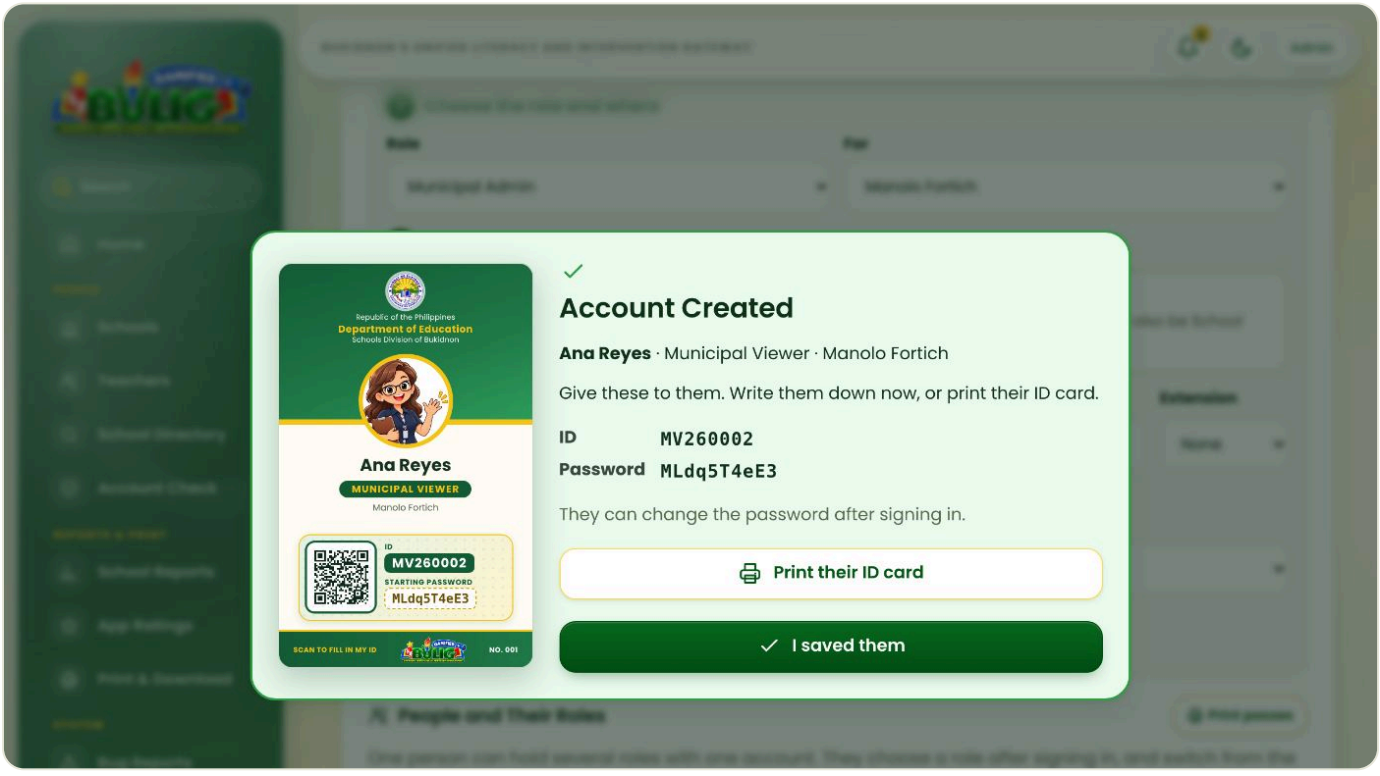

Same name already in BULIG

Same name check

If someone with the same name already exists, BULIG stops and asks **Is this the same person?** Choose **Yes, use this account** (one account, one ID), or **No, create a new account anyway** for two people who share a name. This works for every new account: admins, teachers and pupils.

The new ID and password

The **Account Created** popup shows the new person's **ID card** with the ID, the starting password and a QR code. Print it or write it down, then press **I saved them**. The popup stays until you do.

Account Created, with the ID card

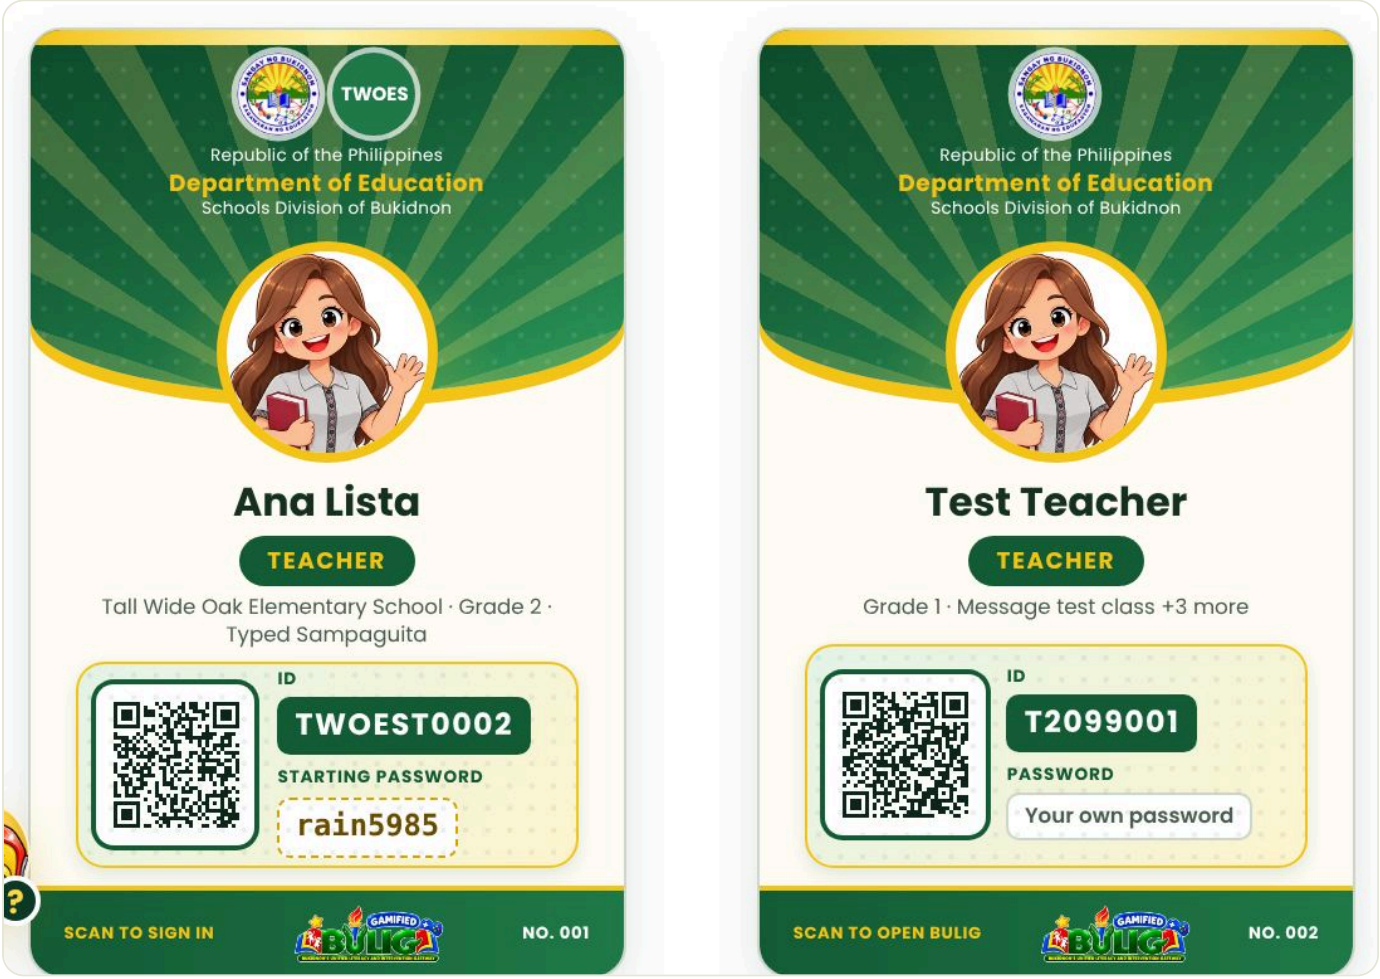

People and their roles

Everyone you manage, with their roles as tags. **New password** makes a new password and shows their ID card again. The **×** on a tag removes that role; the account and its data stay.

CHAPTER 7

ID cards and passes

Administrators and teachers get an ID card. Pupils keep their ticket passes.

Teacher ID cards (Green design)

On every ID card

The Division, municipality and school logos, the person's photo or character, name, role, area, a QR code, the ID, and the starting password until they change it.

Where to print

Admin Passes (Organization › Print passes): the administrators you manage. **Teacher Passes** (School Admin): the teachers of the school.

Design

The Division Admin chooses Green, Official or Landscape at the top of the passes page.

The picture

A profile photo if the person uploaded one; otherwise the male or female BULIG character chosen when the account was made.

QR codes

CARD	WHAT THE QR CODE DOES
Pupil ticket	Signs the pupil in.
Teacher ID card	Signs the teacher in, every time.
Admin ID card	Signs the administrator in (every admin and viewer role).

1. Scan the QR code with the phone camera, or tap **Scan** on the BULIG sign-in page.
2. BULIG shows “Hi, [name]!”. Tap **Let’s go** and you are in.
3. The QR code keeps working when the person changes their own password.

Lost a card? Press **New password** (Organization) or **New starter password** (Teacher Passes). This makes a new password **and a new QR code**, so the lost card stops working. Print the new ID card. Admin ID cards printed before November 2026 only fill in the ID: print them again.

CHAPTER 8

Municipal Admin and Municipal Viewer

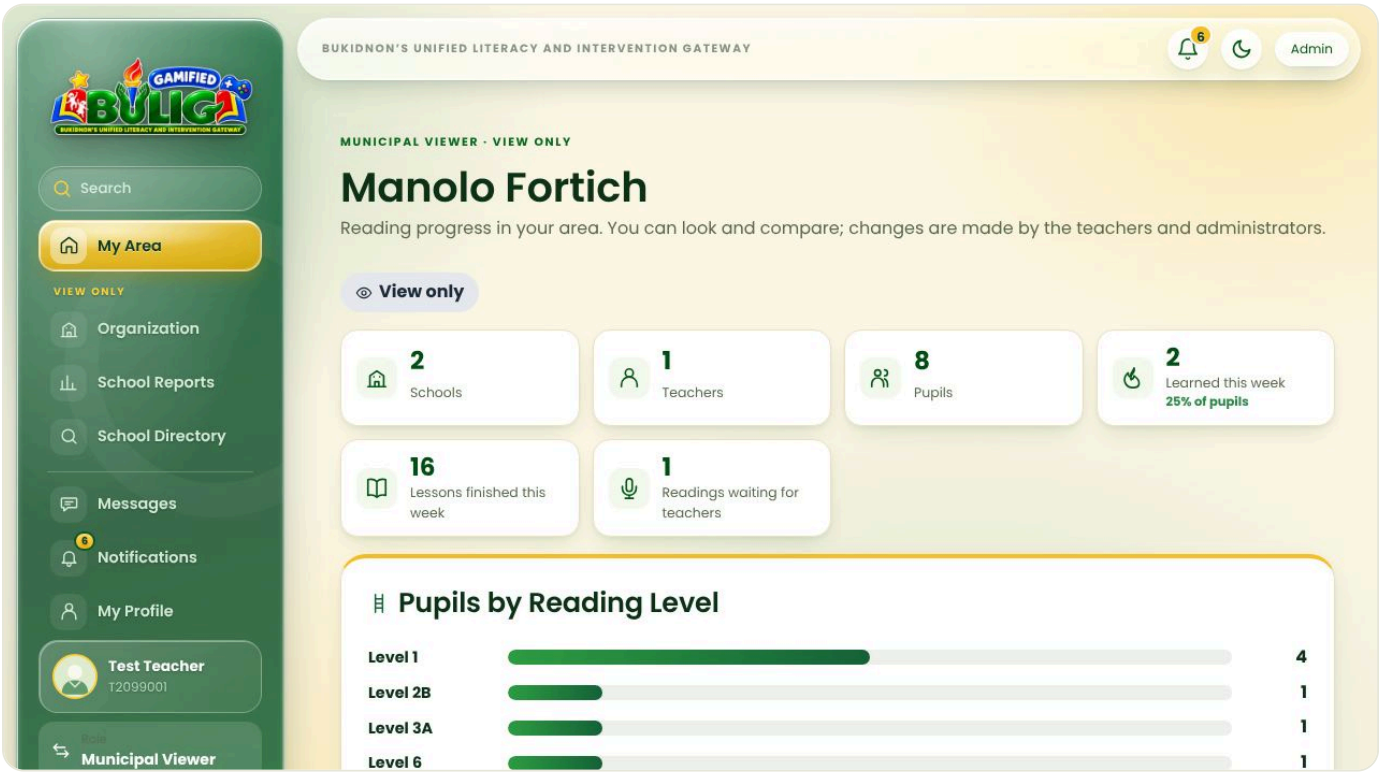

For one municipality, for example Manolo Fortich.

Municipal Admin

Creates the **District Admins** and **District Supervisors** of the town, adds districts, uploads the town logo, sets the district of schools, prints their Admin Passes, and follows progress in the town.

Municipal Viewer

Looks only: the town's schools, teachers, pupils, reading levels and schools compared. Cannot change anything.

A view-only dashboard (Municipal Viewer)

CHAPTER 9

District Admin and District Supervisor

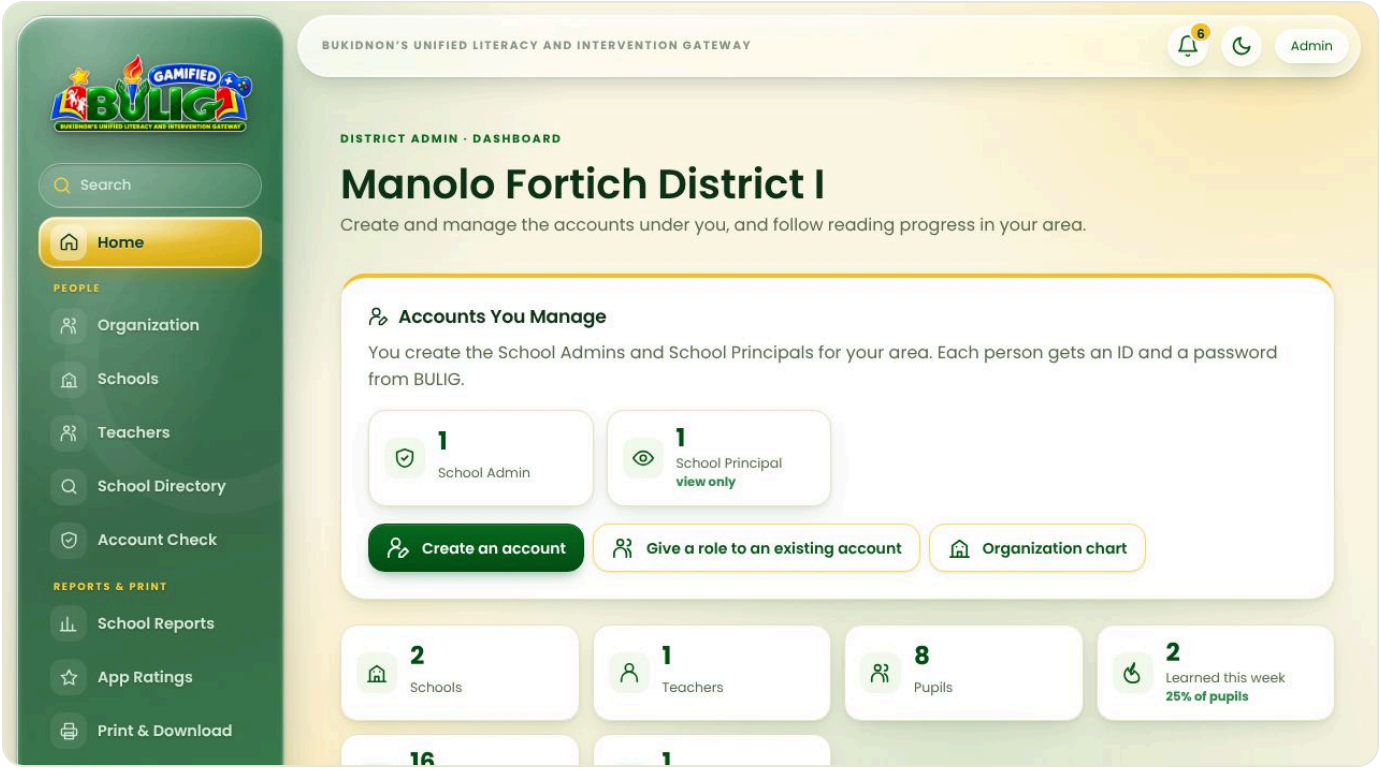

For one district, for example Manolo Fortich District I.

District Admin

Creates the **School Admins** and **School Principals** of the district's schools, adds schools to the district, prints their Admin Passes and follows progress.

District Supervisor

Looks only: the district's schools side by side, pupils by reading level, and readings waiting for teachers.

The District Admin dashboard

District roles cannot add teachers or print Teacher Passes. That belongs to the School Admin.

CHAPTER 10

School Admin and School Principal

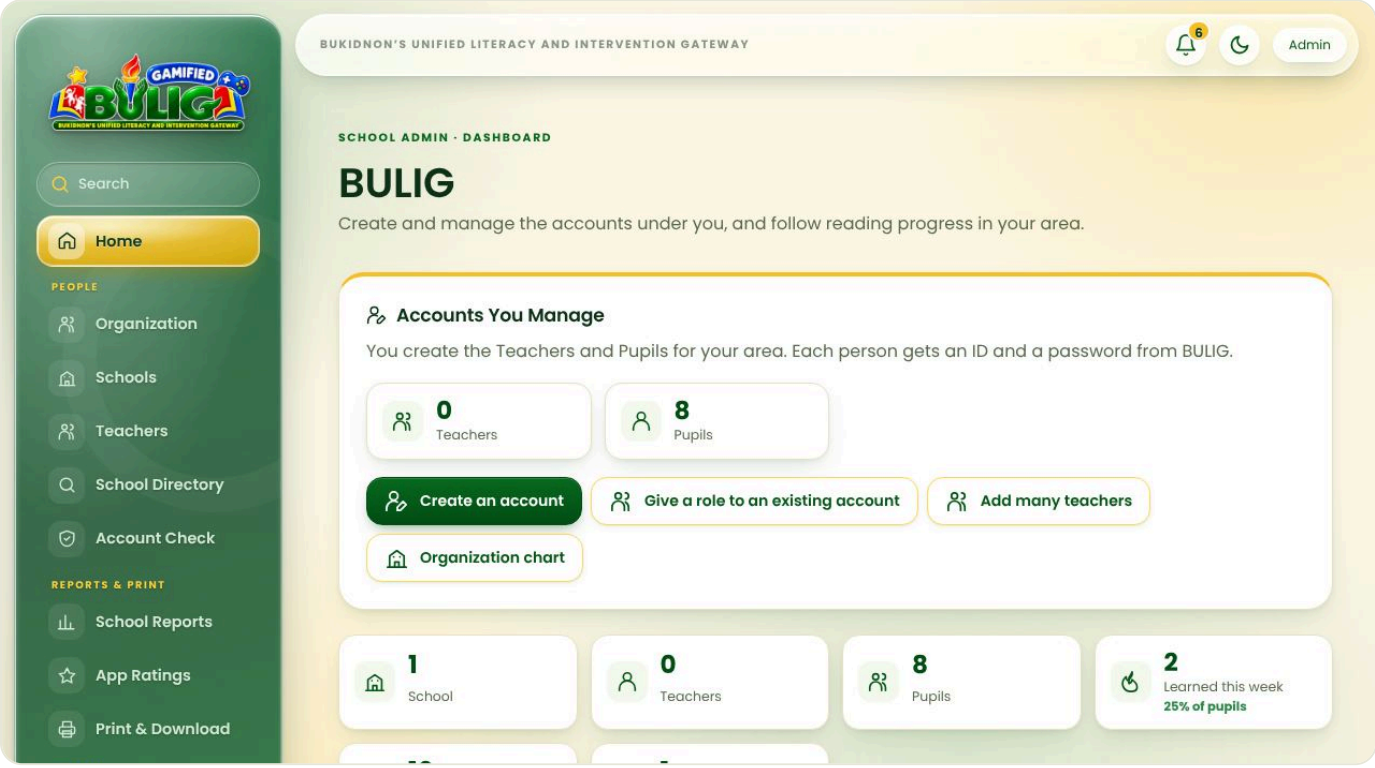

For one school.

School Admin

Creates **teachers** and **pupils** (Organization, or Teachers › Add teachers), prints **Teacher Passes**, resets teacher passwords, moves pupils between teachers, manages sections, posts school announcements and edits the school info.

School Principal

Looks only: the school's numbers, pupils by reading level and the **teachers compared**.

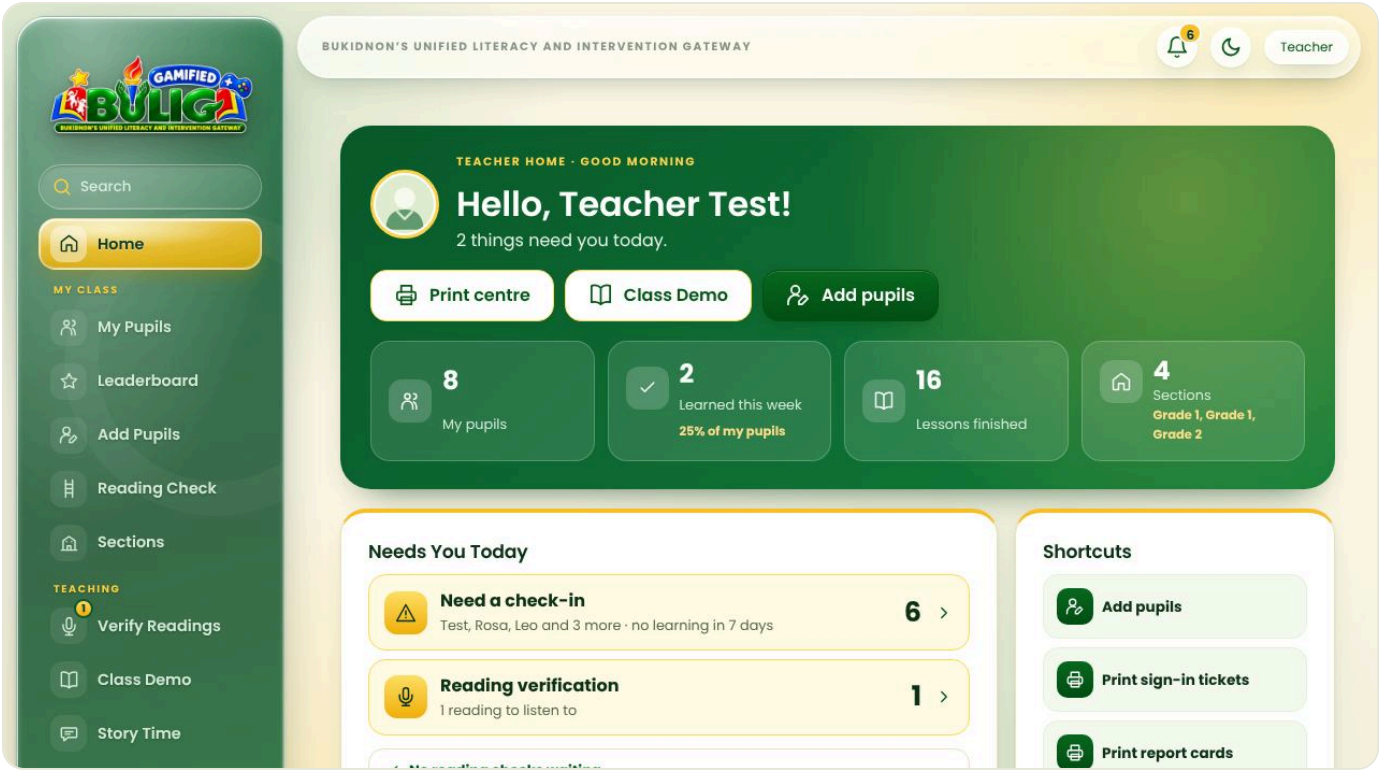

The School Admin dashboard: teachers compared

CHAPTER 11

Teacher

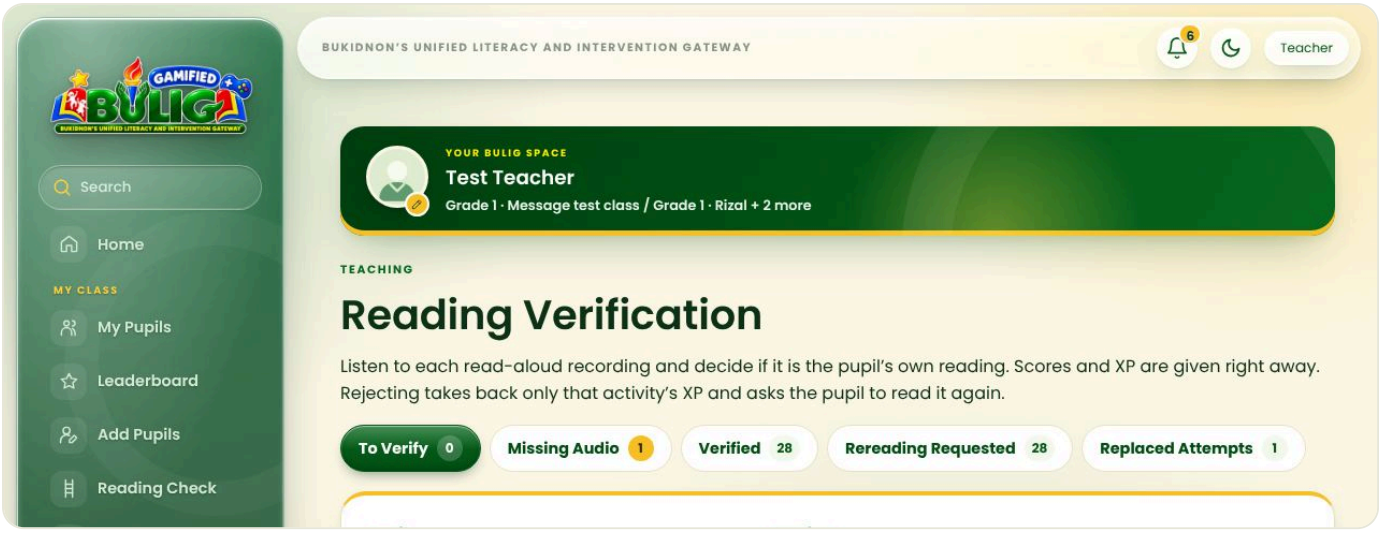

Nothing changed in how a teacher teaches. New: a Teacher ID card, Verify all readings, private chats, and more than one role.

The teacher dashboard

Verify readings, many at once

1. Open **Verify Readings**. Filter by pupil or section if you like.
2. Play each recording. After it plays, its checkbox opens.
3. Tick the readings you listened to, then press **Verify selected readings** (up to 100 at once).

Verify Readings

Add pupils

As before, on Add Pupils. If a pupil with the same name is already in the school, BULIG asks first.

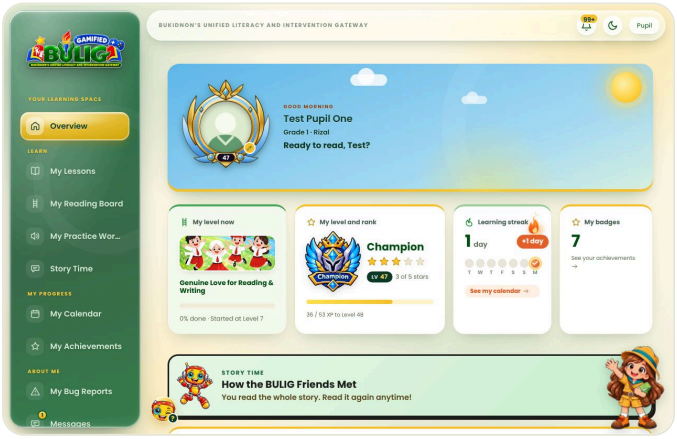

Also a School Admin?

Choose the role after signing in, or switch from the menu. One account, one ID.

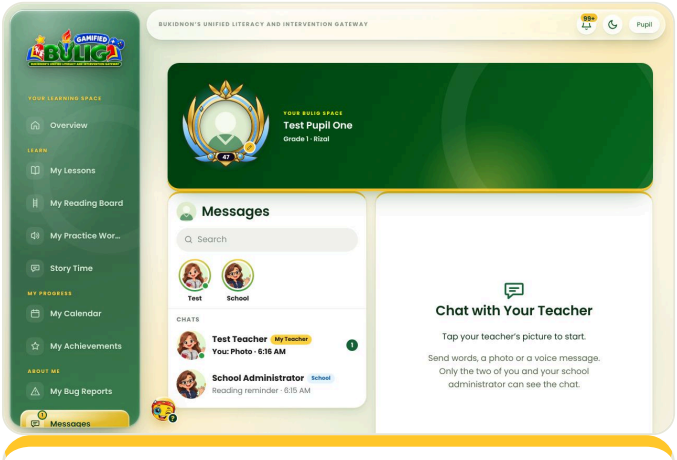

CHAPTER 12

Pupil

Pupils learn as before: lessons, the reading board, practice words, story time and achievements.

The pupil dashboard

Chat with the teacher

Chat with my teacher

Messages, photos and voice messages. Only the pupil and the teacher can see the chat.

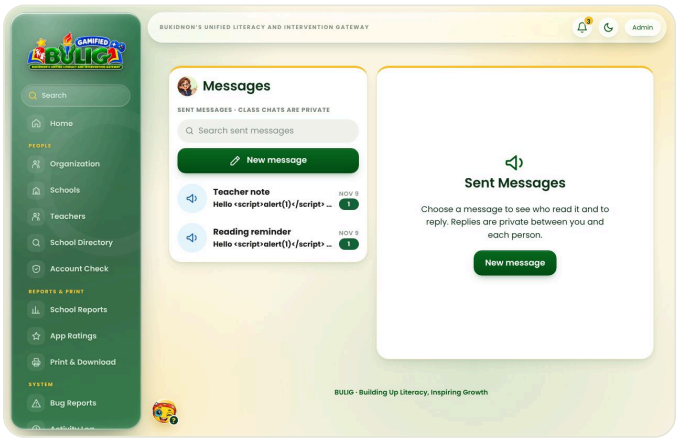

Report a problem

My Bug Reports. When the Division Admin fixes a real bug, the pupil earns XP. No XP is ever taken away.

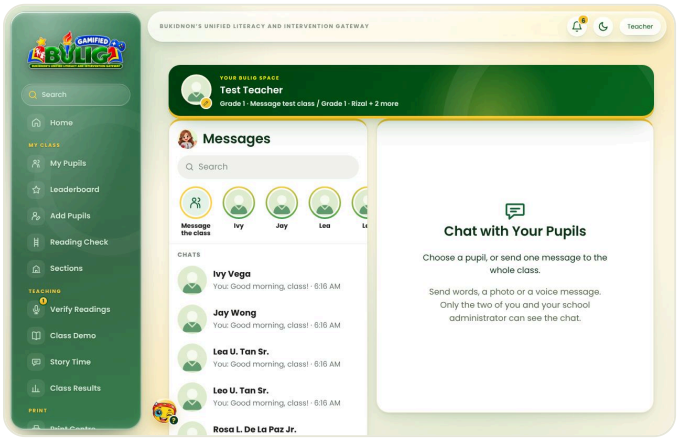

CHAPTER 13

Messages and privacy

Messages work like Messenger. Each chat is private to the people in it.

An administrator's Sent messages

A teacher's chats with pupils

Teacher ↔ pupil chats	Only that teacher and that pupil. **No administrator can read them**, including their photos and voice messages.
Administrator messages	An administrator writes to one person, a class or a school. Replies are private between the administrator and each person.
Photos and voice	Deleted after 60 days.
Your data	My profile › My Data and Privacy: see and download what BULIG keeps (Data Privacy Act, RA 10173).

CHAPTER 14

Bug reports

Pupils and teachers report problems from My Bug Reports. Every report goes to the **Division Admin** only.

Bug reports (Division Admin)

1. Open the report and read it.
2. Change its status: Processing, Fixed or Rejected, and write a reply.
3. The reporter gets a popup with your answer. A fixed real bug gives a pupil XP; a rejected report takes nothing away.

CHAPTER 15

Updating the live site

For the person who uploads BULIG updates.

1. **Back up first**: Print & Download › Backup › Full database.
2. If the update needs SQL, import it in phpMyAdmin. The organization update needs `database/migrations/040_hierarchy_roles.sql` once. It only adds tables and never deletes data.
3. Upload the files from the ZIP to the same folders. A ZIP never contains `config/database.php`.
4. Upload `public/assets/theme.css` too, or the pages look unstyled.
5. Sign in and open Organization. Check the schools waiting for a district.

Tip: if a page looks old after an update, a file was not uploaded. Compare with the list of files in the ZIP.

CHAPTER 16

Questions and answers

Do existing teachers and pupils need new accounts?	No. They keep their ID, password and everything they did.
Does the QR code still work after I change my password?	Yes. Only a New password from your administrator makes a new QR code.
Why did a new account show a female picture?	Choose Male or Female when you add the person. A person can also change their character in My profile, or upload a photo.
I closed the popup and lost the password.	Organization › People and their roles › New password. The old password stops working.
Can a Division Admin read class chats?	No. Teacher–pupil chats are private, like Messenger.
Why can a District Admin not print Teacher Passes?	Teachers belong to the School Admin of their school.
Can I give myself a role?	No. Roles are given by the level above you.
Someone has two roles. Which ID do they use?	The same one. They choose the role after signing in.
A school is not in any district.	Organization › Schools waiting for a district: choose its district.
