PREFACE

Reading is the cornerstone of learning, yet it remains one of the most pressing challenges in education today. In response, the Division of **Bukidnon proudly introduces Bukidnon's Unified Literacy and Intervention Gateway (BULIG) —** a transformative innovation designed to improve learners' reading ability and empower every child to succeed.

BULIG is more than a program; it is a unified movement for literacy, built on collaboration, evidence-based strategies, and a deep commitment to equity in education. This initiative bridges gaps in reading proficiency by providing targeted interventions, innovative approaches, and sustainable support systems that cater to the diverse needs of learners across the division.

Anchored on this vision, the Division of Bukidnon integrates the ARAL Program (Academic Recovery and Accessible Learning), a national initiative focused on learning recovery and remediation. ARAL provides structured and learner-centered interventions for those struggling with foundational skills in reading and numeracy. By complementing BULIG's mission, ARAL strengthens the division's comprehensive approach to literacy, ensuring that learners overcome difficulties and gain the confidence to succeed academically. Together, these programs create a powerful synergy that accelerates learning recovery and builds a strong foundation for lifelong learning.

Through BULIG, we envision classrooms where every learner reads with confidence, comprehends with clarity, and learns with purpose. This gateway opens opportunities for lifelong learning, ensuring that no child is left behind in the journey toward academic excellence and personal growth.

Together, let us make literacy not just a goal, but a reality for all.

Duterte: Send home 24,000 atuarantined OFWs in 1 week, expedite release of COVID test results

By: Krissy Aguilar - Reporter/@KAguilarINQ INQUIRER.net / 07:19 AM May 25, 2020

MANILA, Philippines — President Rodrigo Duterte has given the Department of Labor and Employment (DOLE), Overseas Workers Welfare Administration (OWWA) and the Department of Health (DOH) a week to send home some 24,000 overseas Filipino workers (OFWs) who are awaiting their coronavirus disease 2019 (COVID- 19) results in various quarantine facilities, Malacañang said Monday.

"Inutusan po ng ating Presidente and DOLE, OWWA, at ang DOH na meron lamang silang isang linggo para masiguro na lahat po ng 24,000 na OFWs na kapatid nating mga Pilipino na nagaantay ng resulta ay mapauwi sa kani kanilang probinsya," Presidential spokesperson Harry Roque said on state-run PTV4.

(The President ordered DOLE, OWWA and DOH to make sure that the 24,000 OFWs awaiting their COVID-19 test result are sent home within week.)

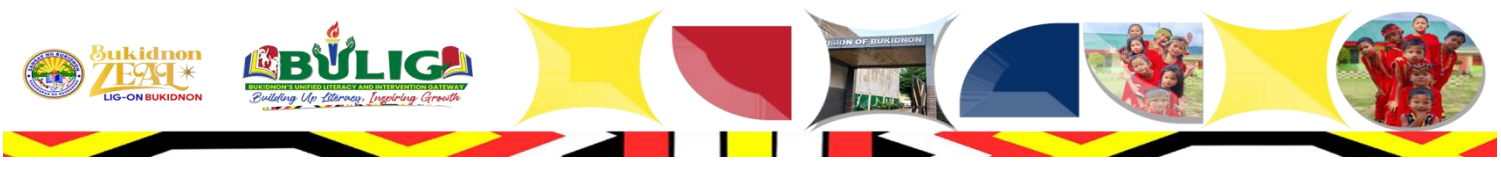

According to Roque, the President said the concerned agencies may utilize all government resources to ferry the OFWs back to their provinces.

Duterte also said there is a need to boost coronavirus disease 2019 (COVID-19) testing nationwide.

"Nagsabi din ang ating Pangulo na kinakailangan palakasin na ang PCR [polymerase chain reaction] testing sa iba't ibang lugar ng Pilipinas, hindi lamang dito sa Metro Manila nang sa ganon, pupuwede na silang umuwi diretso sa kanilang mga probinsya ang mga OFWs at doon na sila magpakuha ng PCT COVID-19 test," he said.

(The President also saw the need to beef up PCR testing nationwide and not only in Metro Manila. That way, OFWs can be tested in their home provinces.)

A number of repatriated OFWs have complained that they have been confined to quarantine facilities beyond the mandatory 14-day isolation period due to the delay in the release of their COVID-19 test results.

Frontliners Amidst Pandemic: A Major Sacrifice to Save Lives

Quezon City, Philippines — On October 24, the total number of Covid-19 cases in the Philippines has surpassed 367,819. As the country suffers from the Covid-19 Pandemic, medical frontliners have shown their never-ending service despite the struggles and discrimination they're experiencing every day as they perform their call of duty. According to the research conducted by Moises Torrentira from the University of Southern Philippines, the following struggles of the medical frontliners include: being evicted from the rented apartment, emotional stress, and depression, and social discrimination. Due to the community quarantine implemented in many places around the country, some medical frontliners rent an apartment where they can stay while having work near the hospital. Unfortunately, some of them are forced to move out due to the owner's fear of being infected since medical frontliners are exposed to the virus. These major sacrifices that every frontliners endures to save people and to save lives — yet being underpaid and unappreciated. These struggles of our modern heroes - frontliners should be addressed properly for them to feel that they're not alone in this time of a pandemic.

Instruction:
Read the editorial carefully. Analyze the writer's stand, arguments, evidence, and overall structure. Then, answer the guide questions in complete sentences. Focus on how the editorial presents opinions, supports claims, addresses counterarguments, and persuades readers to take action.

Should Schools Adopt a Later Start Time?

Many high school students struggle with fatigue, poor concentration, and declining mental health, largely because school starts too early. Research shows that teenagers have different sleep cycles than adults and naturally stay up later at night. It is time for schools to adopt later start times to improve students' health, academic performance, and overall well-being.

First, early school hours negatively impact students' physical and mental health. Sleep deprivation can lead to stress, anxiety, poor immunity, and reduced cognitive functioning. By starting school later, students are more likely to get the recommended 8–10 hours of sleep, leading to better mood, energy, and focus in class.

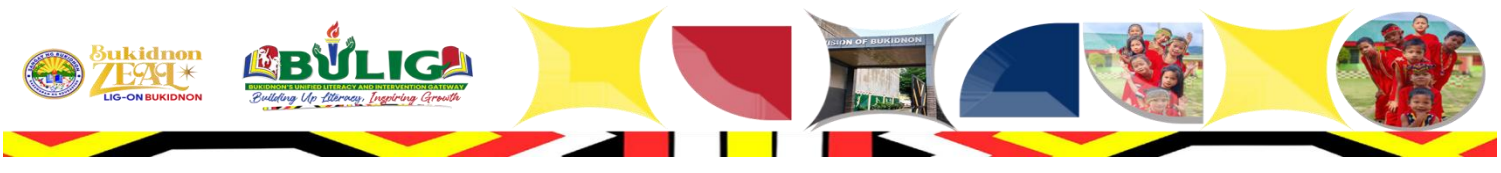

Second, academic performance improves when students are well-rested. Studies indicate that schools with later start times have higher attendance rates, better test scores, and increased engagement in lessons. When students are alert, they can absorb and retain information more effectively, resulting in stronger academic outcomes.

Some argue that changing the start time may interfere with after-school activities, sports, and parental schedules. While adjustments are necessary, the benefits of better sleep and mental health far outweigh the logistical challenges. Schools can modify schedules gradually or provide flexible extracurricular timings to accommodate students and families.

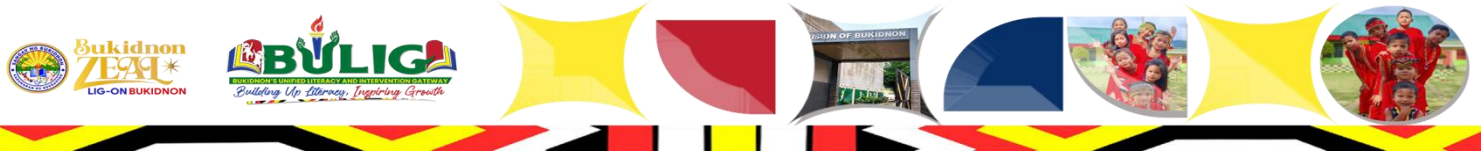

In conclusion, shifting school start times is a simple yet powerful way to support teenagers' physical health, mental well-being, and academic success. Educators, parents, and policymakers must work together to make this change. It's time to prioritize students' needs and give them the rest they deserve.

5. How does the structure (introduction, body, counterargument, conclusion) enhance the clarity and persuasiveness of the editorial?

Activity 19

Identify persuasive techniques used in a professional-style column.
Instructions:
Read the sample column below. Then **identify and explain** at least **five persuasive techniques** used (e.g., emotional appeal, rhetorical questions, statistics, anecdote, tone, call to action).

Sample Column:
"Every year, students complain that school events feel repetitive—and they're right. While traditions are important, repeating the same activities without improvement only drains student interest.
