PREFACE

Reading fluency is the bridge between word recognition and comprehension. Learners who read accurately, automatically, and expressively are more likely to understand complex texts, communicate effectively, and become lifelong readers.

The **Bukidnon's Unified Literacy and Intervention Gateway (BULIG)** continues its commitment to strengthening literacy through this **Level 6 Fluency Toolkit** designed specifically for Junior High School learners in Grades 7 and 8.

This toolkit provides carefully sequenced original poems, stories, dialogues, and informational texts intended to improve oral reading accuracy, rate, expression, and confidence. Every passage has been developed to encourage repeated oral reading while allowing teachers to monitor learners' progress through miscue analysis, oral reading scores, and words-per-minute computation.

The activities support classroom instruction, remediation programs, reading camps, after-class interventions, and independent learning sessions. More importantly, they promote critical thinking, values formation, and appreciation of literature while strengthening oral reading fluency.

The Department of Education envisions every learner becoming a confident, competent, and enthusiastic reader. Through the collaborative efforts of school leaders, teachers, parents, and the community, BULIG continues to provide meaningful opportunities that ensure no learner is left behind.

TEACHER'S GUIDE

Introduction

Reading fluency is the ability to read connected text accurately, automatically, and with appropriate expression. It serves as the foundation for reading comprehension and academic success across learning areas.

This toolkit provides oral reading passages designed for Junior High School learners. Teachers may administer these passages during classroom instruction, remediation sessions, reading intervention programs, and independent practice.

Objectives

At the end of the intervention, learners are expected to:

- read grade-level texts accurately;
- improve oral reading speed;
- demonstrate appropriate phrasing and expression;
- reduce oral reading miscues;
- develop confidence in public reading; and
- improve overall reading comprehension.

Administration Procedures

1. Seat the learner comfortably.
2. Give the learner a copy of the reading passage.
3. Provide the teacher with another copy.
4. Instruct the learner to read aloud naturally.
5. Record all miscues while timing the reading.
6. Compute:

- Oral Reading Score
- Words Per Minute
- Reading Level

7. Record results in the learner's progress sheet.

ORAL READING SCORING

Oral Reading Score

(Number of Words − Miscues) ÷ Number of Words × 100

Reading Level	
Independent	97–100%
Instructional	90–96%
Frustration	89% and below

READING SPEED

Words Read × 60 ÷ Reading Time in Seconds

PRE-ASSESSMENT

The Bridge to Tomorrow

When fourteen-year-old Marco transferred to his new school, everything seemed unfamiliar. The classrooms were larger, the teachers spoke faster, and the students already had their own groups of friends. During his first week, he preferred sitting quietly at the back of the room, hoping no one would notice him.

One morning, their English teacher announced a reading activity. Each learner would read a passage aloud before the class. Marco's heart beat rapidly. He enjoyed reading silently, but speaking before others made him nervous.

When his turn came, he stood slowly and held the reading selection with trembling hands. He took a deep breath and began reading. At first, his voice was soft, but after several sentences he noticed that his classmates were listening attentively. His teacher smiled encouragingly whenever he paused correctly or pronounced a difficult word clearly.

After the activity, several classmates congratulated him. One even asked if they could become partners for the next reading assignment. Marco realized that confidence grows through practice. Every page he read became another step across the bridge toward new friendships and greater opportunities.

PART I

FLUENCY POEMS

Activity 1

The Voice Within

Author: BULIG Development Team (Original)

There is a quiet voice inside,
A faithful friend, a trusted guide.
It tells us when to stand up tall,
To help someone who starts to fall.

It whispers, "Choose the path that's right,
Even when it's out of sight."
It gives us courage, calm, and grace
To meet each challenge that we face.

Sometimes storms may cloud the day,
And doubts may try to block the way.
Yet deep within, that gentle light
Still shines to guide us through the night.

A dream begins with one small step,
With every promise wisely kept.
Success is built on what we do,
On honest hearts that stay sincere and true.

Listen well when choices call.
Your inner voice can conquer all.
With hope and faith beside your way,
You'll grow much stronger every day.

Believe your voice.
Believe your dream.
Become much more
Than you may seem.

Activity 2

Tomorrow Begins Today

Author: BULIG Development Team (Original)

Tomorrow waits beyond the hill,
Prepared for those with strength and will.
It does not ask how rich you are,
Nor where you live, nor near nor far.

It simply asks,
"Will you prepare?
Will you keep learning everywhere?"

A page today,
A book tonight,
Can help your future shine more bright.

Mistakes may come,
And plans may bend,
Yet every challenge has an end.

Each sunrise brings another chance
To learn,
To lead,
To dream,
To dance.

So build your future,
Brick by brick,
With patient hands that never quit.

Tomorrow starts
With what you do—
And all tomorrow
Starts with you.

Activity 3

Beyond the Mountain

Author: BULIG Development Team (Original)

Beyond the mountain stands a dream,
Brighter than the morning gleam.
Many travelers lose their way,
Yet hopeful hearts decide to stay.

They climb through rain,
They climb through heat,
With tired hands and aching feet.

Each rocky trail,
Each winding road,
Makes lighter every heavy load.

The summit waits for those who try,
Who never fear to ask, "Why?"
For every step, though small it seems,
Leads us closer to our dreams.

So if the journey feels too long,
Remember this encouraging song:
No mountain stands forever high—
The brave will always reach the sky.

Activity 4

Digital Footprints

Author: BULIG Development Team (Original)

Every message that we send,
Every photo that we lend,
Leaves a mark upon the way,
Long beyond the passing day.

Kindness posted,
Truth expressed,
Makes the internet its best.

Words can heal,
Or words can harm,
Holding either peace or alarm.

Think before you click "Send,"
Choose the message you defend.
Build a world that's safe and bright,
Guided always by what's right.

Though our screens may glow each night,
Character remains our light.
Let our footprints clearly show
Respect wherever we may go.

Word Count: 85

Reading Speed = Words Read/Reading time in seconds X 60						**words per Minute**		

Activity 5

The Library Window

Author: BULIG Development Team (Original)

Beside the library window wide,
Countless worlds are found inside.
Heroes, oceans, stars, and kings,
Live among the printed things.

Every shelf contains a door,
Opening to something more.
History whispers,
Science sings,
Adventure spreads its eager wings.

A single book can change a mind,
Leaving fear and doubt behind.
Readers travel far each day
Though they never move away.

Turn each page with eager eyes,
Seek the truth,
Be brave,
Be wise.
For every reader soon will find
A stronger heart,
A brighter mind.

Activity 6

A Teacher's Gift

Author: BULIG Development Team (Original)

A teacher plants a tiny seed,
With every lesson, thought, and deed.
Not made of gold or precious stone,
But wisdom learners call their own.

A word of praise, a guiding hand,
Can help a fearful learner stand.
A patient smile, a simple cheer,
Can chase away uncertainty and fear.

Each question asked, each answer found,
Makes knowledge grow on fertile ground.
Though years may pass and seasons shift,
Learning remains a lasting gift.

One day the learner leads the way,
Helping others every day.
The greatest treasure we can give
Is teaching others how to live.

Reading Speed = Words Read/Reading time in seconds X 60						**_____words per Minute**		

Activity 7

The Silent River

Author: BULIG Development Team (Original)

The river never boasts aloud,
Nor seeks applause from any crowd.
Yet day by day it shapes the land
With quiet strength and patient hand.

It bends around the hardest stone,
Still finding pathways of its own.
Its waters teach us not to fight,
But gently choose the wiser right.

Though storms may darken overhead,
The river steadily moves ahead.
It never stops because of fear;
Its destination still is clear.

Like rivers flowing to the sea,
Our dreams become reality
When steady hearts refuse to stray
And choose to grow a little each day.

Reading Speed = Words Read/Reading time in seconds X 60						**_____words per Minute**		

Activity 8

Hope in the Storm

Author: BULIG Development Team (Original)

Dark clouds gather in the sky,
Thunder rumbles rolling by.
Branches bend beneath the rain,
Yet flowers bloom once more again.

Every storm will someday cease,
Giving way to light and peace.
Courage grows through every trial,
Often hidden for a while.

Though the winds may shake the trees,
Hope remains within the breeze.
Morning always follows night,
Bringing warmth and golden light.

So when life seems hard to bear,
Keep believing, keep your care.
Even storms that make us strong
Cannot last forever long.

Activity 9

Every Dream Matters

Author: BULIG Development Team (Original)

Some dream high among the stars,
Others heal invisible scars.
Some create amazing art,
Others serve with faithful heart.

Every dream deserves its place,
Every goal its patient race.
Great achievements always start
From hope inside a willing heart.

Dreams are built through daily choice,
Through discipline and honest voice.
Step by step the future grows,
More than anyone yet knows.

Hold your dream with courage true.
Let determination carry you.
For every dream that lights the night
Can change tomorrow with its light.

Activity 10

We Rise Together

Author: BULIG Development Team (Original)

One small hand can plant a tree,
Two can build community.
Many hearts that work as one
Finish what cannot be done.

Different voices, different minds,
Each unique in countless kinds.
Yet together we become
Stronger than we are alone.

Helping others makes us grow.
Sharing all the things we know.
Kindness spreads from friend to friend,
With no limit, with no end.

Let us build a brighter day,
Choosing hope in every way.
When we stand through every weather,
We discover—
We rise together.

PART II

ORIGINAL FLUENCY STORIES

Activity 11

The Last Seat in the Classroom

Author: BULIG Development Team (Original)

The last seat in Room Seven was always empty until the second week of classes. On Monday morning, a quiet boy named Adrian entered the room carrying an old backpack and a neatly folded notebook. He smiled politely as the teacher introduced him to the class.

Since all the front seats were already occupied, Adrian sat at the back. During lessons, he listened carefully and wrote detailed notes, but he rarely spoke. Some classmates assumed he was shy, while others simply forgot he was there.

One afternoon, the class was assigned a group science project. Adrian's group struggled to organize their ideas. They argued over the experiment and could not agree on who would present.

After listening quietly, Adrian finally raised his hand. "May I suggest something?" he asked.

His classmates nodded.

He explained how they could divide the work fairly. He also showed them a simple experiment he had learned in his previous school. Everyone agreed to follow his plan.

Presentation day arrived. Their experiment worked perfectly, and the class applauded their teamwork. Their teacher praised not only the project but also the way everyone cooperated.

During recess, Adrian no longer sat alone. His classmates invited him to eat with them, asking questions about his old school and sharing stories about their own experiences.

Adrian realized that sometimes people are not noticed because they remain silent. Yet kindness, preparation, and willingness to help often speak louder than words.

From that day forward, the last seat in the classroom became known as the place where a quiet leader once sat.

Activity 12

The New Student

Author: BULIG Development Team (Original)

Lena transferred to a new school halfway through the school year. Everything felt unfamiliar—from the classrooms to the faces she passed along the hallways. Although her teachers were welcoming, she found it difficult to begin conversations with her classmates.

During lunch breaks, Lena usually sat alone beneath a large acacia tree near the school garden. She spent her time reading novels while other students laughed and played nearby.

One rainy afternoon, the school announced a clean-up drive after classes. Every section was assigned an area to organize. Lena quietly joined her classmates in clearing fallen leaves and arranging flower pots.

As they worked together, one of her classmates noticed that Lena knew the names of many different plants. Curious, they asked how she learned so much.

"My grandmother loves gardening," Lena explained. "She taught me how to care for flowers and vegetables."

Soon everyone was asking questions. Lena demonstrated how to prepare seedlings and explained why certain plants needed more sunlight than others.

The following week, their adviser appointed Lena as one of the leaders of the class gardening project. Her classmates eagerly worked beside her, planting vegetables and flowering shrubs that later brightened the school grounds.

Lena realized that friendships often begin with shared work rather than shared words. By simply offering her knowledge and helping others, she found a place where she truly belonged.

Activity 13

One Honest Decision

Author: BULIG Development Team (Original)

It was dismissal time when Joshua noticed a black wallet lying near the school gate. Students hurried past without seeing it. He picked it up and looked around, hoping someone would return to claim it.

Inside the wallet were several identification cards, a few receipts, and a considerable amount of money. Joshua immediately realized that someone must be worried about losing it.

His friends suggested different ideas. One jokingly said, "Nobody saw you. Just keep it."

Joshua smiled but shook his head. "If this belonged to my father, I would hope someone returned it."

Instead of going home immediately, he brought the wallet to the principal's office. The school staff checked the identification card and contacted the owner, who happened to be the father of one of the students.

Less than an hour later, the grateful owner arrived. He counted the money and found that nothing was missing.

"You have saved me from many problems today," the man said warmly. "This money was meant to pay our workers."

He offered Joshua a reward, but the boy politely declined.

"My parents taught me that honesty is worth more than money," Joshua replied.

The principal later shared Joshua's story during the Monday flag ceremony. His classmates applauded as he received a Certificate of Good Citizenship.

Joshua discovered that doing the right thing may not always bring material rewards, but it earns something even greater—the trust and respect of others.

Activity 14

The Forgotten Library Card

Author: BULIG Development Team (Original)

Every Wednesday afternoon, the Grade 8 learners visited the school library. It had become one of Sophia's favorite places because it offered more than books. It provided quiet spaces where she could think, study, and imagine.

One afternoon, she eagerly searched for a science encyclopedia recommended by her teacher. After finding the book, she walked toward the circulation desk.

Then she realized something.

Her library card was missing.

She searched every pocket of her bag, checked her notebooks, and even looked beneath the tables. It was nowhere to be found.

Feeling disappointed, Sophia informed the librarian, who calmly smiled.

"Sometimes," the librarian said, "finding something begins by remembering your last careful moment."

Sophia retraced her steps. She remembered reviewing her assignment under a large narra tree before entering the library.

When she returned outside, she found the card exactly where she had placed it between the pages of her notebook.

Relieved, she borrowed the encyclopedia and thanked the librarian.

That afternoon she learned that careful habits save both time and worry. Since then, she kept all important school cards inside a small transparent organizer attached to her bag.

Small acts of organization, she realized, often prevent bigger problems.

Activity 15

The Science Fair Challenge

Author: BULIG Development Team (Original)

The annual Science Fair was only three weeks away, and excitement filled the campus. Every Grade 8 section had been challenged to present an invention that solved a community problem.

Group Three decided to create a simple rainwater collection system that could help households conserve water during the dry season.

At first, everything seemed easy. However, the prototype leaked during testing.

Some members became discouraged.

"We should change our project," one student suggested.

Their team leader, Camille, disagreed.

"Real scientists don't stop after one failure," she said. "Every mistake teaches us something."

The group carefully examined the design. They discovered that one connector pipe was slightly loose. After making adjustments and sealing the joints properly, they tested the system again.

This time, the container successfully collected rainwater without leaking.

On presentation day, the judges praised not only the invention but also the team's explanation of the scientific process behind their improvements.

Although they placed second overall, the judges selected their project to be displayed during the municipal science exhibit.

Camille smiled as she looked at her teammates.

"We didn't succeed because everything worked the first time," she said.

"We succeeded because we never stopped improving."

Activity 16

A Letter to My Future Self

Author: BULIG Development Team (Original)

As part of their English class activity, each learner was asked to write a letter addressed to themselves ten years in the future.

Most students wrote about the careers they hoped to pursue. Some dreamed of becoming engineers, doctors, teachers, artists, or entrepreneurs.

Miguel stared at his blank paper for several minutes before writing his first sentence.

"Dear Future Me,

I hope you still remember the promises you made when you were fourteen."

He continued writing about the values he wanted to keep—honesty, kindness, humility, and perseverance.

He reminded himself that success should never be measured only by money or awards, but also by the number of lives positively influenced.

Before sealing the letter inside an envelope, he added one final paragraph.

"If life becomes difficult, remember the dreams that inspired you to begin. Keep learning, keep serving, and never stop believing that every day is another opportunity to become a better person."

The teacher collected all the letters and promised to return them during the learners' graduation from senior high school.

As Miguel walked home, he smiled.

Perhaps the most important promise we ever make is the one we make to ourselves.

Activity 17

The Volunteer

Author: BULIG Development Team (Original)

A powerful typhoon had passed through the municipality, leaving many families in need of assistance. Several classrooms were damaged, trees blocked the roads, and many homes lost electricity.

The school organized a volunteer day to help clean the campus and prepare learning spaces for classes to resume.

Among the volunteers was Aaron, a Grade 7 learner who had never joined a community service activity before.

He expected the work to be tiring, and it certainly was.

Students swept classrooms, gathered broken branches, arranged donated books, and repainted faded signboards.

During lunch, Aaron noticed an elderly maintenance worker struggling to carry several heavy boxes.

Without being asked, Aaron immediately helped him.

The man smiled gratefully.

"You remind me that kindness is strongest when nobody asks for it," he said.

By late afternoon, the school grounds looked cleaner than they had before the storm.

Although Aaron returned home physically exhausted, he felt deeply satisfied.

That evening, he reflected on the day's work.

Volunteering had taught him that serving the community is not measured by the size of one's contribution but by the willingness to offer time, effort, and compassion.

Sometimes the greatest reward for helping others is discovering that we have grown stronger ourselves.

Activity 18

The Lost Wallet

Author: BULIG Development Team (Original)

Friday afternoons were always busy at Manolo Integrated High School. Students hurried toward the school gate while others waited for their parents or rode the last jeepneys home.

As Claire walked across the covered court, she noticed a brown wallet beneath one of the benches. She picked it up and looked around, but no one seemed to be searching for it.

Inside were several identification cards, a driver's license, receipts, and enough cash to pay for a week's groceries. Claire immediately imagined how worried the owner must be.

Her friend suggested taking the wallet to the nearest store because someone there might recognize its owner. Another classmate thought they should wait outside the gate.

Claire remembered what their Values Education teacher often said: "When you find something valuable, place it in the hands of someone who is responsible."

She went directly to the Guidance Office. The guidance counselor carefully examined the identification card and discovered that the wallet belonged to the father of a Grade 8 learner.

Within thirty minutes, the grateful parent arrived.

"I thought I had lost this forever," he said with relief. "This contains my salary for the week."

He offered Claire a reward, but she politely refused.

"My reward is knowing everything was returned safely," she replied.

During the next flag ceremony, the school recognized Claire for her honesty.

Her classmates learned that integrity is demonstrated not only during difficult moments but also through simple decisions that no one may ever see.

Activity 19

Race Against Time

Author: BULIG Development Team (Original)

Only two days remained before the Regional Robotics Competition, and Team Innovate was still struggling with their robot's navigation program.

Every afternoon after classes, the four members met inside the computer laboratory. While other students were already heading home, they continued testing sensors, correcting computer code, and redesigning small mechanical parts.

Sometimes the robot stopped without warning. At other times, it turned in the wrong direction or failed to recognize obstacles.

"We're running out of time," Ethan sighed.

Their adviser smiled calmly.

"Success rarely belongs to those who never fail," she said. "It belongs to those who learn quickly from every failure."

The group divided the remaining tasks. Ethan corrected the programming, Mia recalibrated the sensors, Joshua improved the wheels, while Hannah documented every modification.

Late Friday evening, they performed one final test.

The robot moved smoothly through every checkpoint without making a single mistake.

Although the competition was challenging, Team Innovate proudly earned second place.

As they packed their equipment, Ethan realized that winning a medal was rewarding, but learning perseverance, teamwork, and problem-solving was an even greater achievement.

Activity 20

The School Garden

Author: BULIG Development Team (Original)

At the beginning of the school year, the vacant lot beside the library looked dry and neglected. Weeds covered the ground, and very few students paid attention to it.

Their Science teacher proposed a challenge.

"What if we transformed this empty space into a vegetable garden?"

At first, many students doubted the idea.

The soil looked rocky, and the weather had been unusually hot.

Nevertheless, the class accepted the challenge.

Every Wednesday morning, they watered seedlings, removed weeds, added compost, and measured plant growth.

Some vegetables grew quickly, while others struggled.

The students carefully observed how sunlight, rainfall, and soil nutrients affected each plant.

After three months, the once-empty lot had become a colorful garden filled with tomatoes, eggplants, pechay, okra, and herbs.

The harvested vegetables were donated to the school's feeding program.

During the recognition ceremony, the principal congratulated the class.

"You did not simply grow vegetables," she said.

"You cultivated responsibility, patience, and teamwork."

The students proudly realized that meaningful change often begins with small acts repeated consistently.

Activity 21

The Community Hero

Author: BULIG Development Team (Original)

Every morning before sunrise, Mang Ernesto could already be seen sweeping the streets surrounding the public market.

Many people knew him simply as the town's sanitation worker. Few realized that he had been serving the community for more than twenty-five years.

Despite the hot weather and occasional heavy rain, he reported for work every day with a smile.

One Saturday, Grade 8 learners interviewed him for their Araling Panlipunan project about community helpers.

"What motivates you to continue this work?" one student asked.

Mang Ernesto smiled before answering.

"When people wake up and find clean streets, they can begin their day safely and comfortably. Knowing that my work helps others is enough reason to continue."

The students listened attentively.

They realized that heroism is not always found in newspapers or television.

Sometimes heroes quietly perform ordinary tasks with extraordinary dedication.

Inspired by the interview, the class organized a monthly clean-up campaign within their barangay.

Mang Ernesto happily joined them.

By working together, the learners discovered that every citizen has the power to improve the community through simple acts of service.

Activity 22

Beyond the Screen

Author: BULIG Development Team (Original)

Like many teenagers, Daniel enjoyed spending hours playing online games and watching videos after school.

At first, he believed there was nothing wrong with it.

However, he gradually noticed several changes.

He stayed up late every night.

He arrived at school feeling sleepy.

His assignments became incomplete, and his quiz scores slowly declined.

One afternoon, his older sister invited him to join a weekend hiking activity organized by their youth group.

Daniel hesitated.

He almost refused.

Still, he decided to give it a try.

The hike led them through forest trails, rivers, and scenic viewpoints.

Without realizing it, Daniel spent an entire day without checking his phone.

Instead, he laughed with new friends, learned about native trees, and appreciated the beauty of nature.

That evening he reflected on his experience.

Technology is useful, he realized, but balance is essential.

Since then, Daniel scheduled daily screen time while making room for reading, exercise, family conversations, and outdoor activities.

Life beyond the screen offered experiences no device could fully replace.

Activity 23

The Basketball Captain

Author: BULIG Development Team (Original)

The championship game was only minutes away.

Everyone expected Team Falcons to win because they had remained undefeated throughout the season.

As captain, Marcus felt tremendous pressure.

When the first quarter ended, however, his team trailed by twelve points.

Some players began blaming one another for missed shots and defensive mistakes.

During the timeout, Marcus gathered everyone into a circle.

"We cannot change the first quarter," he said calmly.

"But we can decide how we play the next three."

His teammates nodded.

Instead of focusing on individual scoring, they emphasized teamwork.

They passed the ball more carefully, communicated during defense, and encouraged one another after every play.

Little by little, the gap narrowed.

With only fifteen seconds remaining, the score was tied.

Marcus passed the ball to the newest member of the team, who made the winning basket.

The crowd erupted with applause.

After the game, reporters asked Marcus why he did not take the final shot himself.

He smiled.

"A captain's greatest victory is helping the entire team succeed."

Activity 24

The Secret of the Old Mango Tree

Author: BULIG Development Team (Original)

The oldest tree inside San Isidro National High School stood quietly behind the library. Its thick trunk and wide branches had provided shade for generations of learners. Teachers often joked that the tree had witnessed more examinations, graduations, and celebrations than anyone else in the school.

One afternoon, while researching for a local history project, three Grade 8 learners noticed a small metal box partially hidden beneath one of the tree's large roots. Curious but careful, they informed their adviser before touching it.

Together, they carefully removed the box from the soil. Inside they found several yellowed photographs, handwritten letters, and an old class program dated more than forty years earlier.

The school principal contacted retired teachers and alumni to help identify the people shown in the photographs. During the following week, former students visited the school and shared stories about their experiences as learners many years ago.

They spoke about studying without computers, participating in school programs under the same mango tree, and helping build classrooms through community volunteer work.

The learners listened with great interest.

They realized that although school buildings, technology, and teaching methods continue to change, the values of respect, perseverance, and service remain constant through every generation.

Inspired by what they had learned, the Student Government organized a Heritage Corner inside the library. The photographs, letters, and stories were carefully preserved so future learners could appreciate the rich history of their school.

Whenever students gathered beneath the old mango tree, they no longer saw only its strong branches and broad leaves.

They saw living proof that every generation leaves behind lessons for the next.

Activity 25

A New Beginning

Author: BULIG Development Team (Original)

Graduation day had finally arrived.

Rows of proud parents filled the covered court while graduates adjusted their togas and smiled nervously at one another.

Among them sat Nicole, quietly remembering her first day in junior high school.

She had once been afraid to answer questions in class.

Reading aloud made her anxious, and group presentations seemed impossible.

Little by little, everything changed.

Her teachers patiently guided her.

Her classmates encouraged her to participate.

She joined reading activities, accepted leadership roles, and volunteered during school programs.

Each experience strengthened her confidence.

When Nicole's name was called to receive the Leadership Award, the audience applauded warmly.

As she walked across the stage, she remembered every challenge she had overcome—not because life had become easier, but because she had become stronger.

After the ceremony, a Grade 7 learner approached her.

"Ate Nicole," he asked, "what advice can you give someone who is afraid of making mistakes?"

Nicole smiled.

"Never let fear stop you from trying," she replied. "Every mistake teaches something valuable. Every challenge prepares you for a greater opportunity."

Years later, Nicole hoped to become a teacher.

She wanted to help young learners discover what her own teachers had helped her realize:

Education is not simply about earning high grades.

It is about becoming a person who can improve the lives of others.

Every ending, she believed, is simply the beginning of another journey.

PART III

POST-ASSESSMENT

Grade 7 and 8 Posttest Passage

Finding My Voice

Author: BULIG Development Team (Original)

At the beginning of the school year, Aaron preferred listening instead of speaking. Whenever teachers asked volunteers to read aloud, he lowered his head and hoped someone else would be chosen. He worried that his classmates might laugh if he mispronounced a difficult word.

His English teacher noticed his hesitation and encouraged him to spend fifteen minutes each day reading aloud at home. At first, Aaron struggled with unfamiliar vocabulary and paused frequently. However, he continued practicing every evening.

After several weeks, reading became easier. He learned to recognize punctuation marks, read with better expression, and pronounce longer words correctly. His confidence gradually increased.

One day, the school announced a storytelling contest. Although Aaron felt nervous, he decided to participate. He practiced faithfully before his parents, younger sister, and even in front of a mirror.

During the contest, Aaron spoke clearly and confidently. He remembered to pause at commas, change his tone during conversations, and emphasize important ideas. The audience listened attentively from beginning to end.

Although another learner won first place, Aaron received a special award for Most Improved Reader.

Walking back to his seat, he realized that success is not always measured by trophies. Sometimes it is measured by the courage to do something that once seemed impossible.

From that day forward, Aaron no longer feared reading aloud. Instead, he looked forward to every opportunity to learn, improve, and inspire others through the power of words.

POST-ASSESSMENT

Grade 9 and 10 Posttest Passage

Beyond the Finish Line

Author: BULIG Development Team (Original)

When the Regional Innovation Challenge was announced, four Grade 8 learners decided to develop a portable water filtration device using inexpensive and locally available materials.

The project demanded weeks of careful planning, repeated testing, and countless revisions. Sometimes the filter failed to produce clean water. On other occasions, the materials proved too expensive for ordinary families.

Instead of giving up, the team carefully recorded every observation. They consulted science teachers, studied reliable references, and listened to suggestions from community members.

Their persistence eventually paid off.

The final prototype successfully filtered muddy water into clear, usable water within a short period of time. During the competition, the judges praised not only the invention itself but also the learners' explanation of the scientific principles behind its design.

The team received the award for Outstanding Community Innovation.

During the closing ceremony, one judge shared a message that remained with the learners long after the competition ended.

"The finish line is never the end of learning," he said. "It simply marks the beginning of greater responsibilities."

As they returned home, the learners understood the meaning of those words.

Their greatest achievement was not the trophy they carried.

It was the knowledge, perseverance, teamwork, and compassion they had developed while working together to solve a real community problem.

True education prepares learners not only to succeed personally but also to improve the lives of others.
