PREFACE

Reading is the cornerstone of learning, yet it remains one of the most pressing challenges in education today. In response, the Division of **Bukidnon** proudly introduces **Bukidnon's Unified Literacy and Intervention Gateway (BULIG)** — a transformative innovation designed to improve learners' reading ability and empower every child to succeed.

BULIG is more than a program; it is a unified movement for literacy, built on collaboration, evidence-based strategies, and a deep commitment to equity in education. This initiative bridges gaps in reading proficiency by providing targeted interventions, innovative approaches, and sustainable support systems that cater to the diverse needs of learners across the division.

Through BULIG, we envision classrooms where every learner reads with confidence, comprehends with clarity, and learns with purpose. This gateway opens opportunities for life-long learning, ensuring that no child is left behind in the journey toward academic excellence and personal growth.

Together, let us make literacy not just a goal, but a reality for all.

a. Marking and Scoring the Miscues

When administering the Fluency Passages, both the teacher and the student need to have a copy of the passage to be read by the student. While the student is reading a passage orally, the teacher records every miscue committed. The guide in marking and scoring the miscues is shown in Table 1.

Table 1. Marking and Scoring the Oral Reading Miscues

Types of Miscues	Marking the Miscue	Example	Scoring
Mispronunciation	Underline the text and write the phonetic spelling above it.	<i>sleed</i> <u>slide</u>	Count as 1 error every mispronunciation. (The dialectal variation should not be counted as an error).
Omission	Circle the omitted unit of a language.	The <u>huge</u> elephant	Count as one error a word or a phrase omitted.
Substitution	Underline the text and write the substituted word above it.	<i>money</i> <u>monkey</u>	Count as one error every substitution.
Insertion	Use a caret to show where the word/s was inserted and write the word above the caret.	<i>lovely</i> The ^ flowers in the Vase.	Count a word or a phrase inserted as one error.
Repetition	Underline the portion of the text that was repeated.	They found it <u>in the</u>	Count as one error every word or phrase repeated.
Transposition	Use a transpositional symbol over and under the letters or words transposed.	The girl is pret ty	Count as one error every transposition made.
Reversal	Write the word/nonword above the correct word.	<i>dab</i> bad	Count as one error every reversal made.
Self -Correction	Write S above the word that was self- corrected.	<i>S</i> hasn't	Don't count self-correction as an error.

b. Recording the Miscues

The summary of the miscues made are recorded on Table 9 (See Appendix D, Phil IRI Form 4).

Table 5. Summary of Miscues

c. Computing the Oral Reading Score per Passage

The computation of the oral reading score involves counting the number of miscues during oral reading. Each miscue carries equal weight, regardless of whether it affects the meaning of the passage or not. Pedro's oral reading illustrates a sample computation of miscues.

Oral Reading Score: $\frac{\text{the number of words} - \text{number of miscues}}{\text{number of words}} \times 100$

Example: Pedro's Performance in Oral Reading

No. of words in the passage: 65

No. of miscues: 15

$$\frac{65-15}{65} \times 100 = 76.9\%$$

Pedro's rating in oral reading is 76.9%

d. Recording the Speed and Rate in Oral Reading

The teacher-administrator records the time that the student starts reading the passage orally; s/he computes the number of seconds/minutes that it took the student to read the passage.

Pedro was asked to read the passage “The Snail with the Biggest House,” a Grade 5 Pre-test passage which has 103 words. It took him 1.5 minutes (90 seconds) to read the passage. Dividing 103 words by 90 seconds will yield 69; thus, Pedro's reading rate is 69 words per minute.

$$\text{Reading speed} = \frac{\text{No. of words read}}{\text{Reading time in seconds}} \times 60$$

No. of words in the passage: 103

No. of minutes it took Karlo to read it: 1.5mins. (90 seconds)

$$\frac{103 \text{ words read}}{90 \text{ seconds}} = 68.6 \text{ or } 69 \text{ words per minute}$$

Pedro's reading rate: 69 words per minute
