PREFACE

Reading is the cornerstone of learning, yet it remains one of the most pressing challenges in education today. In response, the Division of **Bukidnon proudly introduces Bukidnon's Unified Literacy and Intervention Gateway (BULIG)** — a transformative innovation designed to improve learners' reading ability and empower every child to succeed.

BULIG is more than a program; it is a unified movement for literacy, built on collaboration, evidence-based strategies, and a deep commitment to equity in education. This initiative bridges gaps in reading proficiency by providing targeted interventions, innovative approaches, and sustainable support systems that cater to the diverse needs of learners across the division.

Through BULIG, we envision classrooms where every learner reads with confidence, comprehends with clarity, and learns with purpose. This gateway opens opportunities for life-long learning, ensuring that no child is left behind in the journey toward academic excellence and personal growth.

Together, let us make literacy not just a goal, but a reality for all.

a. Marking and Scoring the Miscues

When administering the Fluency Passages, both the teacher and the student need to have a copy of the passage to be read by the student. While the student is reading a passage orally, the teacher records every miscue committed. The guide in marking and scoring the miscues is shown in Table 1.

Table 1. Marking and Scoring the Oral Reading Miscues

Types of Miscues	Marking the Miscue	Example	Scoring
Mispronunciation	Underline the text and write the phonetic spelling above it.	<i>sleed</i> slide	Count as 1 error every mispronunciation. (The dialectal variation should not be counted as an error).
Omission	Circle the omitted unit of a language.	The huge elephant	Count as one error a word or a phrase omitted.
Substitution	Underline the text and write the substituted word above it.	<i>money</i> <u>monkey</u>	Count as one error every substitution.
Insertion	Use a caret to show where the word/s was inserted and write the word above the caret.	<i>lovely</i> the^ flowers in the vase	Count a word or a phrase inserted as one error.
Repetition	Underline the portion of the text that was repeated.	They found it <u>in the</u>	Count as one error every word or phrase repeated.
Transposition	Use a transpositional symbol over and under the letters or words transposed.	The girl is pret	Count as one error every transposition made.
Reversal	Write the word/nonword above the correct word.	<i>dab</i> bad	Count as one error every reversal made.
Self-Correction	Write S above the word that was self-corrected.	<i>S</i> hasn't	Don't count self-correction as an error.

b. Recording the Miscues

The summary of the miscues made are recorded on Table 9 (See Appendix D, Phil IRI Form 4).

Table 5. Summary of Miscues

	Types of Miscues <i>(Uri ng Mali)</i>	Number of Miscues <i>(Bilang ng Salitang mali ang basa)</i>
1	Mispronunciation <i>(Maling Bigkas)</i>	
2	Omission <i>(Pagkakaltas)</i>

4	Insertion <i>(Pagsisingit)</i>	
5	Repetition <i>(Pag-uulit)</i>	
6	Transposition <i>(Pagpapalit ng lugar)</i>	
7	Reversal <i>(Paglilipat)</i>	
	Total Miscues <i>(Kabuuan)</i>	
	Number of Words in the Passage	
	Oral Reading Score	
	Reading Level <i>(Antas ng Pagbasa)</i>	

c. Computing the Oral Reading Score per Passage

The computation of the oral reading score involves counting the number of miscues during oral reading. Each miscue carries equal weight, regardless of whether it affects the meaning of the passage or not. Pedro's oral reading illustrates a sample computation of miscues.

Oral Reading Score: $\frac{\text{the number of words} - \text{number of miscues}}{\text{number of words}} \times 100$

Example: Pedro's Performance in Oral Reading

No. of words in the passage:

65 No. of miscues:

$$\frac{65 - 15}{65} \times 100 = 76.9\%$$

Pedro's rating in oral reading is 76.9%

Phil-IRI Oral Reading Profile

Reading Level

Independent

Instructional

Frustration

Word Reading Score

97-100%

90-96%

89% and below

d. Recording the Speed and Rate in Oral Reading

The teacher-administrator records the time that the student starts reading the passage orally; s/he computes the number of seconds/minutes that it took the student to read the passage.

Pedro was asked to read the passage “The Snail with the Biggest House,” a Grade 5 Pre-test passage which has 103 words. It took him 1.5 minutes (90 seconds) to read the passage. Dividing 103 words by 90 seconds will yield 69; thus, Pedro's reading rate is 69 words per minute.

$$\text{Reading speed} = \frac{\text{No. of words read}}{\text{Reading time in seconds}} \times 60$$

No. of words in the passage: 103

No. of minutes it took Karlo to read it: 1.5mins. (90 seconds)

$$\frac{103 \text{ words read}}{90 \text{ seconds}} = 60 \text{ words per minute}$$

Pedro's reading rate: 69 words per minute

Phil-IRI Reading Speed Profile

Reading Level	Word Recognition Rate
<i>Independent</i>	90-100%
<i>Instructional</i>	70-89%
<i>Frustration</i>	69% and below

The Crocodile and the Monkey

Once upon a time, there lived a monkey on a mango tree on the banks of a river. The mangoes of that tree were the sweetest of all. The tree bore fruits year-round. The monkey used to live very happily on the tree eating the tasty fruits and playing on the tree.

On a particular day, a crocodile came near that mango tree. He seemed very exhausted. The monkey offered him some delicious mangoes from the tree. The crocodile loved those mangoes and thanked the monkey for the same. From then on, the crocodile used to visit the monkey every day and they became good friends.

One day the crocodile thought to take some mangoes for his wife. When his wife ate the mangoes, she demanded something very absurd from the crocodile. She said that these fruits are so tasty, then how delicious will be the heart of that monkey who regularly eats these mangoes!

She ordered the crocodile to bring the monkey's heart for her. The crocodile was shocked at her demand. The monkey was his friend. How could he betray him? He declined to kill the monkey and bring his heart to her.

The crocodile's wife was adamant about getting the monkey's heart. She told the crocodile that she is not keeping well and the doctor has recommended her to eat a monkey's heart to recover. She even threatened him that if the crocodile didn't get the monkey's heart for her, she would surely die. The crocodile had to give in to her order.

With a heavy heart, the crocodile left to get the monkey. He went to the monkey and said, "Friend, my wife loved the mangoes sent by you. She has invited you to our house to thank you." The monkey agreed and sat on the crocodile's back so that the crocodile could take him to his house.

In the middle of the river, the crocodile began sinking in. The monkey got frightened and he asked the crocodile as to why he was sinking. The crocodile, knowing that now there was no escape for the monkey, replied, "Forgive me, my friend. My wife needs to eat your heart to save her life. That's why I am taking you with me."

The monkey was outraged. The monkey was smart. He kept calm and told the crocodile that he would be more than happy to save his wife's life but he left his heart at the mango tree. The monkey told him that they can quickly go and get his heart from the tree.

The crocodile accepted it at once and turned back. As soon as they reached the tree, the monkey jumped onto the tree and said, "O foolish crocodile, how can someone take out his heart and keep it somewhere else? You have deceived me as a friend. Now go and never come back. The ashamed crocodile went back to his home.

Fight Song

Song by Rachel Platten

Like a small boat, On the ocean, Sending big waves, Into motion
Like how a single word , Can make a heart open
I might only have one match, But I can make an explosion

And all those things I didn't say, Wrecking balls inside my brain
I will scream them loud tonight, Can you hear my voice this time?

This is my fight song, Take back my life song
Prove I'm alright song, My power's turned on
Starting right now I'll be strong, I'll play my fight song
And I don't really care if nobody else believes
'Cause I've still got a lot of fight left in me
Losing friends and I'm chasing sleep
Everybody's worried about me In too deep
Say I'm in too deep (in too deep)
And it's been two years I miss my home
But there's a fire burning in my bones
Still believe. Yeah, I still believe
And all those things I didn't say
Wrecking balls inside my brain
I will scream them loud tonight
Can you hear my voice this time?

This is my fight song, Take back my life song
Prove I'm alright song, My power's turned on
Starting right now I'll be strong, I'll play my fight song
And I don't really care if nobody else believes
'Cause I've still got a lot of fight left in me
A lot of fight left in me, Like a small boat
On the ocean, Sending big waves Into motion
Like how a single word, Can make a heart open
I might only have one match
But I can make an explosion

This is my fight song, Take back my life song
Prove I'm alright song, My power's turned on
Starting right now I'll be strong (I'll be strong)
I'll play my fight song
And I don't really care if nobody else believes
'Cause I've still got a lot of fight left in me
Know I've still got a lot of fight left in me

You Can

If you think you're beaten, you are...
 If you think you dare not, you don't...
 If you like to win...but think you can't...
 It's almost a cinch, YOU WON'T!!

If you think you'll lose, you're lost....
 For out in the world, you'll find...
 Success begins with a fellow's will....
 It's all in a state of mind.

If you think you're outclassed, you are....
 You've got to think high to rise...
 You've got to be sure of yourself before....
 You can ever win the prize.

Life's battles don't always go...
 To the stronger or faster man...
 But sooner or later the one who wins...
IS THE ONE WHO THINKS HE CAN

Print Your Own Medicine

By Lee Cronin

Organic chemists make molecules, very complicated molecules, by chopping up a big molecule into small molecules and reverse engineering. And as a chemist, one of the things I wanted to ask my research group a couple of years ago is, could we make a really cool universal chemistry set? In essence, could we "app" chemistry? Now what would this mean, and how would we do it? Well to start to do this, we took a 3D printer and we started to print our beakers and our test tubes on one side and then print the molecule at the same time on the other side and combine them together in what we call reactionware. And so, by printing the vessel and doing the chemistry at the same time, we may start to access this universal toolkit of chemistry. Now what could this mean? Well, if we can embed biological and chemical networks like a search engine, so if you have a cell that's ill that you need to cure or bacteria that you want to kill, if you have this embedded in your device at the same time, and you do the chemistry, you may be able to make drugs in a new way.

So how are we doing this in the lab? Well, it requires software, it requires hardware and it requires chemical inks. And so the really cool bit is, the idea is that we want to have a universal set of inks that we put out with the printer, and you download the blueprint, the organic chemistry for that molecule and you make it in the device. And so, you can make your molecule in the printer using this software. So, what could this mean? Well, ultimately, it could mean that you could print your own medicine. And this is what we're doing in the lab at the moment. But to take baby steps to get there, first of all we want to look at drug design and production, or drug discovery and manufacturing. Because if we can manufacture it after we've discovered it, we could deploy it anywhere. You don't need to go to the chemist anymore. We can print drugs at point of need. We can download new diagnostics. Say a new super bug has emerged. You put it in your search engine, and you create the drug to treat the threat. So, this allows you on-the-fly molecular assembly.

But perhaps for me the core bit going into the future is this idea of taking your own stem cells, with your genes and your environment, and you print your own personal medicine. And if that doesn't seem fanciful enough, where do you think we're going to go? Well, you're going to have your own personal matter fabricator. Beam me up, Scotty. (Applause)

When You Are Old

William Butler Yeats

When you are old and grey and full of sleep,
And nodding by the fire, take down this book,
And slowly read, and dream of the soft look

Your eyes had once, and of their shadows
deep;

How many loved your moments of glad grace,
And loved your beauty with love false or true,
But one man loved the pilgrim soul in you,

And loved the sorrows of your changing face;

And bending down beside the glowing bars,

Murmur, a little sadly, how Love fled

And paced upon the mountains overhead

And hid his face amid a crowd of stars.

Jimmy Jet and His TV Set

Shel Silverstein

I'll tell you the story of Jimmy Jet--
And you know what I tell you is true.
He loved to watch his TV set
Almost as much as you.

He watched all day, he watched all night
Till he grew pale and lean,
From "The Early Show" to "The Late Show"
And all the shows in between.

He watched till his eyes were frozen wide,
And his bottom grew into his chair.
And his chin turned into a tuning dial,
And antennae grew out of his hair.

And his brains turned into TV tubes,
And his face to a TV screen.
And two knobs saying "vert." and "horiz."
Grew where his ears had been.
And he grew a plug that looked like a tail
So we plugged in little Jim.
And now instead of him watching TV
We all sit around and watch him.

Pygmalion: Henry and Eliza

George Bernard Shaw's play *Pygmalion* was the basis for the famous musical *My Fair Lady*. First performed in 1913, *Pygmalion* is the story of Eliza Doolittle, a poor and unsophisticated flower seller on the streets of London, who wants to learn to speak "like a lady." In this passage from Act I, she has met by chance Professor Henry Higgins, a grumpy professor of phonetics, near a church during a rainstorm. They are amongst a group of people who have gathered under the church's portico to stay dry. Henry has been listening to the other people as part of his research. Eliza was afraid for a time that he was a policeman trying to arrest her and is just beginning to recover from her fear. Henry is "The Note Taker" below. Eliza is "The Flower Girl," and "The Gentleman" is Colonel Pickering, who was part of the group. The rain has stopped.

The Flower Girl: Poor girl! Hard enough for her to live without being worried and chivied.

The Gentleman: [returning to his former place on the note taker's left] How do you do it, if I may ask? *The Note Taker:* Simply phonetics. The science of speech. That's my profession; also my hobby. Happy is the man who can make a living by his hobby! You can spot an Irishman or a Yorkshireman by his brogue. I can place any man within six miles. I can place him within two miles in London. Sometimes within two streets.

The Flower Girl: Ought to be ashamed of himself, unmanly coward!

The Gentleman: But is there a living in that?

The Note Taker: Oh yes. Quite a fat one. This is an age of upstarts. Men begin in Kentish Town with 80 pounds a year, and end in Park Lane with a hundred thousand. They want to drop Kentish Town; but they give themselves away every time they open their mouths. Now I can teach them—

The Flower Girl: Let him mind his own business and leave a poor girl—

The Note Taker: [explosively] Woman: cease this detestable boohooing instantly; or else seek the shelter of some other lace of worship.

The Flower Girl: [with feeble defiance] I've a right to be here if I like, same as you.

The Note Taker: A woman who utters such depressing and disgusting sounds has no right to be anywhere—no right to live. Remember that you are a human being with a soul and the divine gift of articulate speech: that your native language is the language of Shakespeare and Milton and The Bible; and don't sit there crooning like a bilious pigeon.

The Flower Girl: [quite overwhelmed, and looking up at him in mingled wonder and deprecation without daring to raise her head] Ah—ah—ah—ow—ow—oo!

The Note Taker: [whipping out his book] Heavens! what a sound! [He writes; then holds out the book and reads, reproducing her vowels exactly] Ah—ah—ah—ow—ow—ow—oo!

The Flower Girl: [tickled by the performance, and laughing in spite of herself] Garn!

The crocodile's wife was adamant about getting the monkey's heart. She told the crocodile that she is not keeping well and the doctor has recommended her to eat a monkey's heart to recover. She even threatened him that if the crocodile didn't get the monkey's heart for her, she would surely die. The crocodile had to give in to her order.

With a heavy heart, the crocodile left to get the monkey. He went to the monkey and said, "Friend, my wife loved the mangoes sent by you. She has invited you to our house to thank you." The monkey agreed and sat on the crocodile's back so that the crocodile could take him to his house.

In the middle of the river, the crocodile began sinking in. The monkey got frightened and he asked the crocodile as to why he was sinking. The crocodile, knowing that now there was no escape for the monkey, replied, "Forgive me, my friend. My wife needs to eat your heart to save her life. That's why I am taking you with me."

The monkey was outraged. The monkey was smart. He kept calm and told the crocodile that he would be more than happy to save his wife's life but he left his heart at the mango tree. The monkey told him that they can quickly go and get his heart from the tree.

The crocodile accepted it at once and turned back. As soon as they reached the tree, the monkey jumped onto the tree and said, "O foolish crocodile, how can someone take out his heart and keep it somewhere else? You have deceived me as a friend. Now go and never come back. The ashamed crocodile went back to his home.

Types of Miscues	Mispronunciation	Omission	Substitution	Insertion	Repetition	Transposition	Reversal	Total
Number of Miscues								
Number of Words in the Passage						491		
Oral Reading Score = $491 \frac{\text{ } }{\text{ } } / 491 \times 100$
