PREFACE

Reading remains the cornerstone of all learning, yet it continues to be one of the most persistent and complex challenges confronting basic education today. In response to this need, the Schools Division of Bukidnon proudly introduces the **Bukidnon's Unified Literacy and Intervention Gateway (BULIG)** —a division-wide transformative innovation designed to strengthen reading proficiency, accelerate learning recovery, and ensure that every learner develops the literacy skills necessary for academic success and lifelong learning.

BULIG is not merely a program; it embodies a unified literacy movement grounded in collaboration, evidence-based practices, and a strong commitment to equity and inclusivity in education. Guided by its tagline, **"Building Up Literacy, Inspiring Growth," BULIG** aspires to cultivate a culture where reading is valued, supported, and sustained—empowering learners to reach their full academic and

personal potential.

By harmonizing instructional approaches, consolidating reading intervention materials, and promoting consistent implementation across schools, **BULIG** provides a coherent and adaptive support system that responds to the diverse needs of learners. It seeks to close longstanding gaps in reading performance, strengthen teacher capacity, and institutionalize effective and sustainable literacy practices.

Central to the implementation of **BULIG** is its alignment with the ARAL Program (Academic Recovery and Accessible Learning)—DepEd's national learning recovery initiative. By integrating ARAL's targeted intervention cycles, diagnostic assessments, and remediation strategies, **BULIG** strengthens its capacity to address learning loss, support struggling readers, and reinforce foundational skills essential for progression in the curriculum. This synergy ensures that learners receive timely, differentiated, and research-informed interventions that enable them to overcome reading challenges and build confidence.

Through the unified efforts of **BULIG** and **ARAL**, the Division of Bukidnon envisions classrooms where every learner reads with fluency, comprehends with accuracy, and engages with texts meaningfully. The initiative aspires to cultivate empowered, independent readers equipped with the skills necessary for higher-order learning, academic excellence, and holistic development.

As we move forward, let us affirm our collective commitment to making literacy not only a priority but a guaranteed reality for all learners. Through shared responsibility, strong instructional leadership, and unwavering dedication to quality basic education, we can ensure that no Bukidnon learner is left behind in the pursuit of literacy and lifelong learning.

SKILL C – Drawing Conclusion

THE FIRST MONKEY

Long time ago, there was a farmer who had a wide corn field. He grew big and sweet corn. One day he saw some of his corn gone. Many corn plants had no more fruits. He wanted to catch whoever stole his corn.

The next day he hid behind a big mango tree. He carried a stick. He watched and watched until he saw a man coming. The man passed through a broken part of the fence. The man began to pick some corn.

The farmer went from behind the mango tree and walked towards the man. The farmer ran after him, but he could not catch up with him. Then he threw the stick at the man. The stick hit the man's back and became a tail. The man went up the tree. He became smaller and smaller until he became a monkey.

SKILL D - Predicting Outcomes

THE BEES

The bees live in a big family. There are many bees in the family. We cannot count them. The bee family is called a swarm. The swarm lives in the hive. The hive hangs on the tree. Each swarm has a mother bee. She is called the queen bee. She is the mother of all the bees in the swarm. There are two kinds of bees. The busy bees are called workers. The lazy bees are called drones. The workers do not like the drones. They sting the lazy drones. The workers gather nectar from flowers. They put the nectar in the hive. The bees make the nectar into honey. Honey is sweet. It is the food of the young bees.

Directions: Read each question carefully. Choose the correct answer from the options provided and encircle the letter of your choice

1. If the queen bee were not in the hive, what might happen to the swarm?
A. The swarm would gather more nectar than usual.
B. The young bees might not have a mother to care for them. C. The workers would become lazy drones.
D. The hive would fall from the tree.

2. If the worker bees stopped gathering nectar, what could happen to the hive?
A. The hive would become stronger.
B. The hive would be full of honey.
C. The young bees might not have food to eat.
D. The drones would start stinging the queen.

3. If the drones were suddenly very hardworking, what might happen?

A. The workers would still sting them.
B. There would be more honey in the hive.
C. The queen bee would leave the hive.
D. The swarm would split into two.

4. If a storm knocked down the tree with the hive, what could be the result for the bees?
A. They would continue making honey in the same place. B.
They might have to find a new place to live.
C. The queen bee would sting the young bees.
D. The workers would become lazy.

5. If the bees did not make honey from nectar, what might happen? A. The young bees might go hungry.
B. The drones would start collecting nectar.
C. The hive would produce more nectar.
D. The workers would leave the swarm.
